TROUBLESHOOTING FREQUENTLY ASKED QUESTIONS

TROUBLE	PROBABLE CAUSE	SOLUTION
Unit does not turn on	Not plugged in	Plug in unit
Mist output minimal to none	Filter has not absorbed water	Wait 15 minutes for filter to absorb water
Filter turns brown	The filter has absorbed minerals	Replace your filter (HWF65) by calling 1-800-5-HOLMES, or visit *www.holmesproducts.com*

FREQUENTLY ASKED QUESTIONS

QUESTIONS	ANSWER
What are the variables that affect run time?	The estimated run time for this humidifier is based on average room conditions. The actual run time of your humidifier is dependent on numerous variables such as: 1. Air exchange in the room where the humidifier is placed. 2. Room construction where the humidifier is placed. 3. Temperature of the room where the humidifier is placed. 4. Humidity levels in the room where the humidifier is placed. 5. Movement of occupants and the opening and closing of doors in the room where the humidifier is placed. 6. Home furnishings in the room where the humidifier is placed.
How do I remove film on water tank?	See Daily Maintenance instructions. Regular cleaning is recommended.
How can I extend the run time?	1. Run your unit on the lowest setting. 2. If your unit has electronics, set it to your desired humidity level. The unit will turn on and off, which will extend the run time. 3. Fill the tank all the way full, place it on the base, let the water empty into the base until it stops bubbling, then refill the tank full again. This ensures maximum water capacity and will extend run time.

PLEASE READ AND SAVE THESE IMPORTANT SAFETY INSTRUCTIONS

Thank you for purchasing this Holmes® product. We understand the value of quality and are committed to making superior products that stand the test of time. We trust this product will exceed your expectations of quality and reliability. We hope that you enjoy this product and will consider purchasing another Holmes® product in the future.

To see our full product line or if you have any questions or comments about this product, please visit our website at: www.holmesproducts.com.

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

1. Read all instructions before using the appliance.
2. To avoid fire or shock hazard, plug the appliance directly into a 120V AC electrical outlet.
3. Keep the cord out of heavy traffic areas. To avoid fire hazard, NEVER put the cord under rugs or near heat registers.
4. DO NOT place humidifier near heat sources such as stoves, radiators, and heaters. DO locate your humidifier on an inside wall near an electrical outlet. The humidifier should be at least 4" away from the wall for best results.
5. NEVER place humidifier in an area where it is accessible to children. NEVER use humidifier in a closed room, particularly where a child may be sleeping, resting, or playing (a closed room may result in excessive humidity).
6. WARNING: Do not attempt to refill humidifier without first unplugging the unit from its electrical outlet. Failure to heed this warning may cause personal injury. Be sure to unplug the unit by pulling on the plug and not the cord.
7. Never place anything over moisture outlet when the unit is running.
8. NEVER drop or insert any object into any openings.
9. DO NOT operate any appliance with a damaged cord or plug, after the appliance malfunctions, or if it has been dropped or damaged in any manner. Return appliance to manufacturer for examination, electrical or mechanical adjustment, or repair.
10. Use appliance only for intended household use as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock, or injury to persons. The use of attachments not recommended or sold by the manufacturer may cause hazards.
11. DO NOT use outdoors.
12. Always place humidifier on a firm, flat, level surface. A waterproof mat or pad is recommended for use under the humidifier. NEVER place it on a rug or carpet, or on a finished floor that may be damaged by exposure to water or moisture.
13. DO NOT allow the Moisture Outlet to directly face the wall. Moisture could cause damage, particularly to wall paper.
14. Humidifier should be unplugged when not in use.
15. NEVER tilt, move, or attempt to empty unit while it is operating. Shut off and unplug before removing the water tank and moving the unit.
16. This humidifier requires daily and weekly maintenance to operate appropriately. Refer to daily and weekly cleaning procedures. Use only cleaners and additives recommended by the manufacturer.
17. NEVER use detergents, gasoline, glass cleaner, furniture polish, paint thinner, or other household solvents to clean any part of the humidifier.
18. Excessive humidity in a room can cause water condensation on windows and some furniture. If this happens, turn the humidifier OFF.
19. Do not use humidifier in an area where humidity level is in excess of 50%. Use a hygrometer, available at your local retailer or through the manufacturer, to measure the humidity.
20. DO NOT attempt to repair or adjust any electrical or mechanical functions on this unit. Doing so will void your warranty. The inside of the unit contains no user serviceable parts. All servicing should be performed by qualified personnel only.
21. Never place housing under water flow or immerse in liquids.
22. Do not plug in the cord with wet hands: electric shock could result.

THIS PRODUCT IS EQUIPPED WITH A POLARIZED PLUG (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact qualified personnel to install the proper outlet.

DO NOT DEFEAT THE SAFETY PURPOSE OF THIS POLARIZED PLUG IN ANY WAY

Debe tomar precauciones básicas de seguridad siempre que utilice artefactos eléctricos para reducir el riesgo de incendio, descarga eléctrica y daños personales, incluyendo lo siguiente:

1. Lea completamente las instrucciones antes de utilizar el artefacto.
2. Para evitar incendio o descarga eléctrica, enchufe el artefacto directamente en un tomacorriente de 120V CA.
3. Mantenga el cable fuera de las zonas de mucho tráfico. Para evitar incendios, NUNCA coloque el cable debajo de alfombrillas o cerca de salidas de calefacción.
4. NO coloque el humidificador cerca de fuentes de calor
9. NO utilice ningún artefacto si el cable o el enchufe están dañados, luego de una falla, o si se ha caído o ha sufrido cualquier tipo de daño. Devuelva el artefacto al fabricante para su inspección, ajuste eléctrico o mecánico, o reparación.
10. Utilice el artefacto únicamente para el propósito hogareño indicado en este manual. Cualquier uso distinto al recomendado por el fabricante puede causar incendio, descarga eléctrica, o daños personales. El uso de accesorios no recomendados o que no sean vendidos por el fabricante puede ser peligroso.
11. NO utilizar en el exterior.
12. Siempre coloque el humidificador en una superficie firme, plana y nivelada. Se recomienda el colocar una alfombrilla o bandeja resistente al agua debajo del humidificador. NUNCA lo coloque sobre un tapete o una alfombra, o en un piso que pueda dañarse con el agua o la humedad.
13. NO haga que la salida de humedad apunte directamente a la pared. La humedad puede causar daños, especialmente al empapelado.
14. Se debe desenchufar el humidificador cuando no se usa.
15. NUNCA incline, mueva o intente vaciar la unidad
