Introduction

Thank you for purchasing the *HEPAtech*TM Air Purification System from Hunter Fan Company. You have purchased our latest development in portable Air Purification Systems. This system has been developed to improve the quality of the air you breathe.

Our *HEPAtech*TM Air Purification System out performs other air purification systems by quickly and effectively removing dust, smoke, and pollen particles as small as .1 microns in size. Room air is pulled in through the front grill and cleaned across the *HEPAtech*TM filter. Clean air is then released out the top grill in order to avoid stirring up settled particles.

Using the Ionizer

Using the ionizer improves the quality of air in the room. Negative ions are released into the air and positively charged dust, smoke, and pollen particles are attracted to the negative ions. These particles settle out of the air and can be vacuumed up during normal cleaning. These particles are also more easily captured by the *HEPAtech*TM filter as they pass through the *HEPAtech*TM Air Purification System. To ensure the best air circulation in the room, we recommend that you place your air purifier six inches away from any walls.

Remote Control

1. **Controls:** For your convenience, a remote control is provided with this air purifier. The remote may be used to turn the air purifier on or off, adjust the fan speed, set the timer, and turn the ionizer on or off. The air purifier will beep once to alert you that it has received the command and then it will modify the appropriate setting. If the remote is not working properly, first be sure that the remote is facing the air purifier when pressing the key. If it still does not work, check the batteries.
2. **Batteries:** Install two AAA batteries (UM-4 or IEC R03 or Equivalent). Refer to the printed graphics in the battery compartment for the proper orientation of the batteries.

Using Your Air Purifier

1. Remove your air purifier from the box and take it out of the clear plastic protective bag.
2. Place your *HEPAtech*TM Air Purification System on a firm, flat surface.
3. Before turning the Air Purifier 'on', you need to open the front grill. To release the front grill, place your fingers behind the tabs and pull forward.
4. The filter will be installed in the correct position. Grasp the filter and pull it forward. Remove the plastic wrapping and replace the filter in the unit. The white filter material should be facing outward (towards you) and the black carbon material should be hidden from view (inside the unit).
5. Replace the front grill. Be sure that the bottom tabs are in location first, and then push the top of the grill forward until it is closed. The unit is now ready for normal operation.
NOTE: This unit will not operate unless the door is placed in the correct position.
6. Plug the unit into a 120V electrical outlet.

Cleaning And Filter Replacement

(Model 30377 uses Replacement Filter 30930.)

1. Clean the outside of the unit with a soft, damp cloth. The front grill can be removed and cleaned in soapy water.
2. When you remove the front grill to clean it, you should also remove the pre-filter from the front grill and gently wash it in soapy water. Washing the pre-filter can help extend the life of your *HEPAtech*TM Filter. **Be sure that all parts are completely dry before you reassemble them to the Air Purifier.**
3. Every few weeks, you should open the front grill and view the condition of the *HEPAtech*TM Filter. Compare the filter to the color coded chart that is on the inside of the housing. If the filter matches the dark color on the chart, you should remove the filter and replace it with a new filter. **Be sure to remove any plastic wrapping that may be on the new filter before you place it into the Air Purifier.**
