Vintage™ Professional Built-in Sani-Clean Dishwasher

The power of imagination has given birth to **Vintage's New Professional Built-in Stainless Sani-Clean Dishwasher**, which combines modern day technology and superb design. The Vintage professional dishwasher makes program selection very simple with fully electronic control for longer life and more intelligent programs. The Vintage professional dishwasher's dynamic memory also keeps track of the last program used. The Vintage professional dishwasher is manufactured with the best stainless steel materials available, which not only protect it from heat and corrosion, but also sanitize your dishes with one of the highest temperatures available (164°) in the industry. The Vintage professional dishwasher is among the most quiet in the industry.

The Vintage™ Professional Built-in Sani-Clean Dishwasher – Style and Performance Together For the First Time.

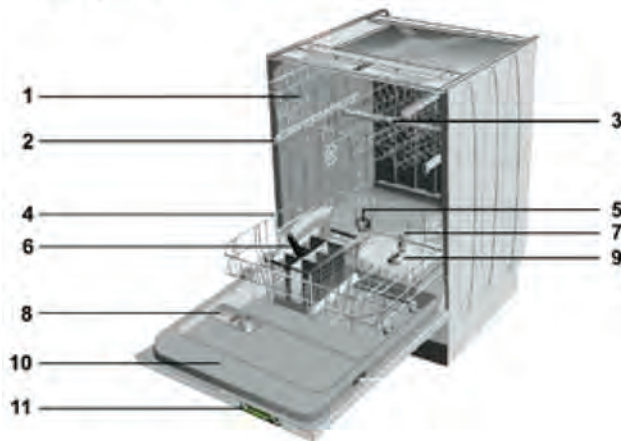

Built-in Stainless Sani-Clean Dishwasher Features

- **Stainless Steel Tank** – Made with the best stainless steel materials available, sanitizes your dishes with one of the highest wash temperatures available (164°).
- **Quiet Operation** – Utilizing three layers of insulation including bituminous material, cotton insulation and side walls, it's one of the most quiet dishwashers in the market.
- **SmartFIT™ and SmartBALANCE™** – SmartFIT™ is a height adjustment mechanism which allows the rear feet to be adjusted from the front. In addition, fully integrated dishwashers have a front adjustable hinge system, SmartBALANCE™, which helps achieve a perfectly balanced door by adjusting the dishwasher to the weight of your kitchen cabinet door.
- **Electronic Controls** – The electronic display offers you a quick and easy way to select your programs. Additionally, products with numerical display offer an "end of cycle chime", which reminds you that your wash cycle has finished and the dishes are ready to use. Also, the hidden control panel prevents your children from changing programs and playing with your dishwasher.
- **Flow Through Heater** – The heater is concealed to provide a safer, more convenient alternative, to the conventional exposed heater. This allows plastic dishware to be placed on both top and bottom racks with damage.
- **Built-in Water Softener** – The water softener can help you reduce your water hardness to a manageable level and prevent your glasses and dishes from being etched.
- **3 Way Filtering System** – Removes even the smaller dirt particles and ensures circulation of clean water.

Dishwasher Dimensions (in inches): 32 1/2" x 23 9/16" x 21 5/8"

- | | |
|--|------------------------|
| 1. Upper rack | 7. Lower spray arm |
