MODEL 30177 AIR PURIFIER

**READ ALL INSTRUCTIONS BEFORE USING THIS AIR PURIFIER
AND SAVE THESE IMPORTANT INSTRUCTIONS**

IMPORTANT SAFETY INSTRUCTIONS

1. This Air Purifier may not work properly on an uneven surface. **ALWAYS** place this Air Purifier on a firm, level surface. **ALWAYS** place the Air Purifier at least six (6) inches away from walls and heat sources such as stoves, radiators or heaters.
2. Place the Air Purifier in an area that is out of the reach of children.
3. Before using the Air Purifier, extend the cord and inspect for any signs of damage. **DO NOT** use the product if the cord has been damaged.
4. This product has a polarized plug (one blade is wider than the other) as a safety feature. This plug will fit into a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. **DO NOT** attempt to defeat or override this safety feature.
5. **ALWAYS UNPLUG** the Air Purifier when it is not in operation, while the filter is being changed, and while it is being cleaned.
6. **DO NOT** tilt or move the Air Purifier while it is in operation. Shut off and unplug before moving.
7. **DO NOT** immerse the Air Purifier in water as permanent damage will occur. Refer to and follow the **CLEANING AND FILTER REPLACEMENT** instructions.

Introduction

Your Hunter Air Purifier has been designed to remove both visible and invisible particles of air pollution from the air we breathe.

The polluted air enters through the large front grill. The polluted air then passes through a pleated mechanical filter to remove the airborne particles. The air then passes through a charcoal filter to remove odors. The cleaned air then re-enters the room through the top grill of the air purifier.

Preparation for Operation

Remove the air purifier from the carton and plastic bag and inspect it for possible damage.

Using Your Air Purifier

1. Place your Air Purifier on a hard, flat surface.
2. Before turning the Air Purifier 'on', you need to open the front grill and remove the protective plastic that is surrounding the

filter. To release the front grill, place your fingers behind the tabs and pull forward.

3. The filter will be installed in the correct position. Grasp the filter and pull it forward. Remove the plastic wrapping and replace the filter in the unit. The white filter material should be facing outward (towards you) and the black carbon material should be hidden from view (inside the unit).
4. Replace the front grill. Be sure that the bottom tabs are in location first, and then push the top of the grill forward until it is closed. The unit is now ready for normal operation.
5. Plug the unit into a 120V electrical outlet.
6. Select a speed by turning the rotary dial. You may want to use the high speed when you are not in the room and use the low speeds when you are in the room.
7. Turn the ionizer 'on' by pressing the switch to the '●' position. The green light will be illuminated when the ionizer is 'on'.

Using the Ionizer

Using the ionizer helps improve the quality of air in the room. Negative ions are released into the air, and positively charged dust, smoke, and pollen particles are attracted to the negative ions. They cling to one another and become a larger particle. These larger particles are then easily trapped in the filter.

Mounting the Air Purifier to the Wall (See Figure 2)

1. Mount bracket to the base of the air purifier.
2. Mount wall bracket to the wall (use toggle bolts for drywall).
3. Hang the air purifier upside down on wall bracket and plug into wall.

Cleaning And Filter Replacement

1. Clean the outside of the unit with a soft, damp cloth. The front grill can be removed and cleaned in soapy water.
2. Every few weeks, you should open the front grill and view the condition of the filter. Compare the filter to the color code chart that is on the inside of the housing. If the filter matches the dark color on the chart, you should remove the filter and replace it with a new filter. Be sure to remove the plastic wrapping before placing the new filter into the Air Purifier.

Replacement Parts:

To obtain a replacement part for your Air Purifier, call customer service at 901-744-1200. Please be prepared to tell the operator the model number of your Air Purifier and the name of the part you need to replace. Refer to Figure 1 for part names.

If you are ordering a replacement filter, please tell the operator you need replacement filter model number 30920 or 30905.
