Step Nine It is recommended to use a humidifier to achieve maximum controlled humidity in the home.

Since your humidifier operates on a 240V supply connection coming from a double switch.

CAUTION: YOU ARE WORKING WITH HIGH VOLTAGE. ANY CONNECTIONS, DETERRING FROM THE INSTRUCTIONS IS TO BE USED AND NOT RECOMMENDED. AFTER MAKING ALL THE CONNECTIONS, REPLACE THE FUSE.

TIPS ON

1. Draining The Unit

Regular draining of your humidifier is important because when the unit's output is extremely high, water droplets are suspended in the water in the reservoir. These droplets settle at the bottom of the unit, and drain away during draining. To ensure proper draining, follow this draining schedule:
