

CarriAir Portable Air Cleaners

Clean your air without polluting your ears.

CarriAir portable air cleaners provide maximum indoor air quality. Impurities are drawn into the unit, and are routed through a special filtering system. Fresh air is returned to the room through the top vent, minimizing secondary contamination caused by units which blow air onto the floor. The unit runs so quietly, we added an LED indicator to let you know it's operating.

**50%
QUIETER¹**

**HEPA MEDIA
99.97%
FILTER**

All CarriAir models offer these features:

- Over 50% quieter than other leading brands¹
- "Pure-check"[™] LED indicator tells you when to replace filter
- Three blower speeds
- Power cord housing

CarriAir HEPA Technology Air Cleaner models:

- 99.97% Filter media efficiency²
- Captures smoke, dust, lint, pollen, mold spores and bacteria in the HEPA media filter system
- Carbon-activated pre-filter helps extend the life of your HEPA material filter²

CarriAir Smoke & Odor Air Cleaner models:

- 97% Filter media efficiency³
- Filter contains 240 grams of carbon-activated particles⁴
- Captures smoke, odors, dust, lint, pollen, mold spores and bacteria in the HEPA media and carbon-activated filter system
- Carbon-activated pre-filter helps extend the life of your system filter

31CSB2201D	210	220	340

1 year
Limited Warranty

Before we clean the air, let us clear up the terminology.

CADR (Clean Air Delivery Rate) – The amount of clean air, measured in cubic feet per minute, that an air cleaner delivers to a room. The CADR Smoke Value was chosen because it is the smallest particle measured by AHAM’s testing program.

AHAM (Association of Home Appliance Manufacturers) – AHAM developed the CADR Rating Standard.

HEPA (High Efficiency Particulate Air) – Filter technology that strains air of fine, airborne particles, and virtually eliminates all particles as small as .3 microns.

Room Size – Carrier’s recommended room size for each unit and its tested CADR.

Product Specifications:

Disclaimers:

- 1 – Based on comparison of models of similar CADR and recommended room size running at high speed as listed in AHAM’s directory of certified room air cleaners, Jan. 1999.
- 2 – The filtration material used in this appliance has been independent laboratory tested to certify that it meets the stringent High Efficiency Particulate Air filter (HEPA) standards and will eliminate 99.97% of all contaminants larger than 0.3 microns that pass through the filter. The stated efficiency of the filtering material is not indicative of the actual performance of the actual assembled filter.
- 3 – The filtration material used in this appliance has been independent laboratory tested and will eliminate 97% of all contaminants larger than 0.3 microns that pass through the filter. The stated efficiency of the filtering material is not indicative of the actual performance of the actual assembled filter.
- 4 – Actual carbon content may vary slightly.
