

GAS BARBEQUE GRILLS

Beat the heat with these cool Vermont Castings gas grills!

The VC0620A and VC0680A are two great new BBQ models that offer solid performance & great looks at a fabulous price. These new grills are constructed of sturdy and durable materials like aluminum casting, ROC™ (Rugged Outdoor Composite) and heavy weight porcelain cast.

VC0620A and VC0680A

The solid aluminum side shelves will never rust, warp or split like wood, and thereby provide a strong, safe surface to hold almost anything. The VC0620A and VC0680A BBQ grills come with a unique cast brass "H" burner. These grill models feature dual infinite control valves, which provides a wide cooking range temperature (from 350 to 800°F). This system allows you to slow-cook, sear or use indirect heat.

Both grills come ready to use with 40 high-density, pyramid style ceramic briquettes. The pyramid shaped briquettes provide even heat distribution and helps reduce the possibility of flare-ups.

The VC0620A (green base with black hood) is available in propane only, while the VC0680A (charcoal base with black hood) is available in Propane or Natural Gas.

They're a cinch to assemble.

The Vermont Castings VC0620A & VC0680A models are designed to assemble quickly and easily. The modular assembly requires no more than 24 stainless steel, rust-free fasteners. Everything else is pre-assembled and pre-tested in the factory. You can go from carton to cooking in less than 30 minutes!
