GENERAL SAFETY

conducted through the legs of portable grills.

- Do not enlarge orifice or burner ports when cleaning the valves or burner.
- Do not use charcoal or lava rock in your gas barbecue grill.
- Use the regulator that is supplied with the barbecue.

WARNING

- Keep the grill in a level position at all times.
- Remove the lid from the grill while lighting and getting the charcoal started.
- Always put charcoal on top of the charcoal grate and not directly into the bottom of the bowl.
- Never touch the cooking or charcoal grate or the grill to see if they are hot.
- Use barbecue mitts or hot pads to protect hands while cooking or adjusting the vents.
- Use proper barbecuing tools with long, heat-resistant handles.
- Use the hook on the inside of the lid to

hang the lid on the side of the bowl of the grill. Avoid placing a hot lid on carpet or grass. Do not hang the lid on the bowl handle.

- To extinguish the coals, place the lid on the bowl and close all of the vents (dampers). Make sure that the vents/dampers on the lid and the bowl are completely closed. Do not use water because it will damage the porcelain finish.
- To control flare-ups, place the lid on the grill. Do not use water.
- Handle and store hot electric starters carefully.
- Keep electrical cords away from the hot surfaces of the grill.

TO START A CHARCOAL GRILL

- Remove the lid and open all air vents before building the fire. NOTE: For proper airflow, remove accumulated ashes from the bottom of the grill if present (only after the coals are fully extinguished). Charcoal requires oxygen to burn, so be sure nothing clogs the vents.
- Mound the briquets into a pyramid-shaped pile or pile the charcoal into a Weber® RapidFire® chimney starter.
- Place either Weber® FireStarters™ lighter cubes (they are non-toxic, odorless and tasteless) or crumpled newspaper under the pile of briquets and light. NOTE: We purposely left out instructions for using lighter fluid. That's because we think the choices previously outlined are superior. Lighter fluid is messy and can impart a chemical taste to your food unless it is thoroughly burned off. If you choose to use lighter fluid, follow the manufacturer's instructions and NEVER add lighter fluid to a burning fire.

- When coals are covered with a light grey ash (usually 25 to 30 minutes), arrange the coals with long-handled tongs according to the cooking method you are going to use.
- For additional smoke flavor, consider adding hardwood chips or chunks (soaked in water for at least 30 minutes and drained) or moistened fresh herbs such as rosemary, thyme, or bay leaves. Place the wet wood or herbs directly on the coals just before you begin cooking.
- When removing the grill lid during cooking, lift to the side, rather than straight up. Lifting straight up may create suction, drawing ashes up onto your food.

EASY STEPS TO GRILLING GREATNESS

Follow these tips and you won't go wrong. And neither will your dinner.

HELPFUL HINTS

- Resist the urge to use a spatula to press down on foods such as burgers. You'll squeeze out all that wonderful flavor.
- A light coating of oil will help brown your food evenly and keep it from sticking to the cooking grate. Always brush or spray oil on your food, not the cooking grate.

FOOD SAFETY TIPS

- Wash your hands thoroughly with hot, soapy water before starting any meal preparation and after handling fresh meat, fish, and poultry.
- Do not defrost meat, fish, or poultry at room temperature. Defrost in the refrigerator.
- Never place cooked food on the same plate the raw food was on.
- Wash all plates and cooking utensils which have come into contact with raw meats or fish with hot, soapy water and rinse.

USE OF WEBER RECIPES

- All recipes in this book have been developed on the basis of 70°F/21°C weather and little or no wind. Therefore, if you are cooking on a cold and/or windy day or at high altitudes, it may be necessary to allow more time.
- The cooking times in this book should be used as guidelines, not exact cooking times, as much depends upon the size and thickness of the food.

ATTACHING THE LP CYLINDER

- Turn burner control valve clockwise to the LOCK/OFF position. Push the cylinder slightly into valve while turning clockwise until a snug fit is obtained.
- Check the gas connection for leaks. Mix a couple tablespoons of liquid detergent with an equal amount of water. Be sure to leave the burner control valve to the LOCK/OFF position. Wet the connections with the detergent solution, turn heat control valve on and watch for bubbles. If bubbles form or if a bubble grows, there is a leak.
- If there is a leak, check the fitting, make sure it is tight and recheck the connections.
- Check for gas leaks each time you disconnect and reconnect the gas supply.

LIGHTING YOUR GAS GRILL

- Always remove the lid before lighting your grill.
- With Flavorizer® Bar in place, turn the burner control valve to the HIGH

position and push the igniter button repeatedly until a flame appears on the burner. Check to see if both sides of the burner are lit by looking through the viewing hole in the Flavorizer Bar.

- Replace lid and preheat for 10 minutes.

WARNING: If the burner does not light, turn the burner control valve to OFF and wait five minutes to let the gas clear before you try again or try to light with a match.

Manual lighting - with a lit match in one hand, turn burner control valve to the HIGH position and place match into one of the four holes underneath the grill.

EASY GAS GRILL CARE

Your gas grill is equipped with the advanced Flavorizer® System that eliminates messy, grease-collecting lava rocks. Gas grill care (and delicious gas grill cooking) was never easier. Follow these easy steps frequently:

CHARCOAL GRILL COOKING

DIRECT METHOD

The Direct Method means that the food is cooked directly over prepared coals. For even cooking, food should be turned once, halfway through the grilling time. Use the Direct Method for foods that take less than 25 minutes to cook: steaks, chops, kabobs, vegetables, and the like.

1. Open all vents.
2. Heap the recommended amount of charcoal briquets in the center of the charcoal grate (refer to the chart below).
3. Ignite the charcoal briquets. Leave the lid off until the briquets have a light coating of grey ash, about 25 to 30 minutes.
4. Spread prepared briquets evenly across the charcoal grate.
5. Position the cooking grate over the coals.
6. Place food on the cooking grate.
7. Place the lid on the grill. Consult your recipe for recommended cooking times.

| Grill Diameter | Briquets Needed |

| 14 1/2" (37 cm) | 30 |

| 22 1/2" (57 cm) | 50 |
| 37 1/2" (95 cm) | 150 |

CHARCOAL GRILL COOKING

INDIRECT METHOD

Use the Indirect Method for foods that require 25 minutes or more of grilling time or for foods so delicate that direct exposure to the heat source would dry them out or scorch them. Examples include roasts, bone-in poultry pieces, and whole fish as well as delicate fish fillets. To set up for Indirect cooking, prepared charcoal briquets are set on either side of the food. Heat rises, reflects off the lid and inside surfaces of the grill, and circulates to slowly cook the food evenly on all sides. There's no need to turn the food over.

NOTE: For meats that require more than one hour to cook, additional briquets must be added to each side as indicated in the chart below.

1. Open all vents.
2. Place the recommended amount of charcoal briquets on each side of the charcoal grate (refer to the chart below). Leave enough room for a drip pan between the coals.

3. Ignite the lid, the lid will coat the food in minutes.
4. Place the food on the grill.
5. Position the charcoal briquets on either side of the food.
6. Place a drip pan between the coals.
7. Place the food on the grill according to the recipe.

GRILLING GUIDE

The following cuts, thicknesses, weights, and grilling times are meant to be guidelines rather than hard and fast rules. Cooking times are affected by such factors as altitude, wind, outside temperature, and desired doneness. Two rules of thumb: Grill steaks, fish fillets, boneless chicken pieces, and vegetables

using the Direct Method for the time given on the chart or to the desired doneness, turning once halfway through grilling time. Grill roasts, whole poultry, bone-in poultry pieces, whole fish, and thicker cuts using the Indirect Method for the time given on the chart or until an instant-read thermometer reaches the desired

internal temperature for beef and pork. For chicken, use the following definitions: medium-rare, 160°F; medium, 170°F; otherwise, 180°F. For fish, use the following definitions: medium-rare, 125°F; medium, 135°F; otherwise, 145°F. For vegetables, use the following definitions: medium-rare, 150°F; medium, 160°F; otherwise, 170°F.
