## Cutout Dimensions (in inches)

\*U.L. Requirement.

**Note:** A 6" minimum spacing to adjacent side wall is required

**Note:** In some cabinets, the sides may need to be scooped or braces removed in order to accommodate the cooktop.

**Wall Installation:** Wall installations require 25" countertop on the wall, the fan housing can be rotated to the horizontal position. Make a countertop cutout that is centered in the range and installation type. Duct hole is positioned in back of cabinet.

**Peninsula or Island Installation:** For peninsula or island installation, a depth of 25" is suggested. Blower should be in vertical position. Adjustment in cutout depth and/or location within the width of the bottom of cabinet for island or peninsula installation.

**Slab Installation:** For peninsula or island installation and approved piping should be used if installing under a concrete slab.

**Installing the Ductwork:** Use minimum 26-gauge galvanized round or 3-1/4" x 10" size, or combination of both.

**PVC duct or locally approved piping should be used under a concrete slab.**

## Preparing the Cabinet for Installation

Specification Created 6/02

### Rear wall venting (in inches)

### Downward venting (in inches)
