Broan-NuTone LLC, 926 West State Street, Hartford, WI 53027  
NuTone, Inc., 4820 Red Bank Road, Cincinnati, OH 45227  
Broan-NuTone Canada, INC.1140 Tristar Drive, Mississauga, Ontario, L5T 1H9

# READ AND SAVE THESE INSTRUCTIONS

## WARNING

SUITABLE FOR USE IN HOUSEHOLD COOKING AREA.

TO REDUCE THE RISK OF FIRE, ELECTRICAL SHOCK, OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:

1. Use this unit only in the manner intended by the manufacturer. If you have questions, contact the manufacturer at the address or telephone number listed in the warranty.
2. Before servicing or cleaning unit, switch power off at service panel and lock service panel to prevent power from being switched on accidentally. When the service disconnecting means cannot be locked, securely fasten a prominent warning device, such as a tag, to the service panel.
3. Installation work and electrical wiring must be done by a qualified person(s) in accordance with all applicable codes and standards, including fire-rated construction codes and standards.
4. Sufficient air is needed for proper combustion and exhausting of gases through the flue (chimney) of fuel burning equipment to prevent backdrafting. Follow the heating equipment manufacturer's guidelines and safety standards such as those published by the National Fire Protection Association (NFPA), and the American Society for Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), and the local code authorities.
5. When cutting or drilling into wall or ceiling, do not damage electrical wiring and other hidden utilities.
6. Ducted fans must always be vented to the outdoors.
7. Do not use this unit with any solid-state speed control device.
8. To reduce the risk of fire, use only steel ductwork.
9. This unit must be grounded.

TO REDUCE THE RISK OF A RANGE TOP GREASE FIRE:

- A. Never leave surface units unattended at high settings. Boilovers cause smoking and greasy spillovers that may ignite. Heat oils slowly on low or medium settings.
- B. Always turn hood ON when cooking at high heat or when cooking flaming foods.
- C. Clean ventilating fans frequently. Grease should not be allowed to accumulate on fan or filter.
- D. Use proper pan size. Always use cookware appropriate for the size of the surface element.

## WARNING

TO REDUCE THE RISK OF INJURY TO PERSONS IN THE EVENT OF A RANGE TOP GREASE FIRE, OBSERVE THE FOLLOWING:\*

1. SMOTHER FLAMES with a close-fitting lid, cookie sheet, or metal tray, then turn off the burner. BE CAREFUL TO PREVENT BURNS. If the flames do not go out immediately, EVACUATE AND CALL THE FIRE DEPARTMENT.
  2. NEVER PICK UP A FLAMING PAN - You may be burned.
  3. DO NOT USE WATER, including wet dishcloths or towels - violent steam explosion will result.
  4. Use an extinguisher ONLY if:
    - A. You know you have a Class ABC extinguisher and you already know how to operate it.
    - B. The fire is small and contained in the area where it started.
    - C. The fire department is being called.
    - D. You can fight the fire with your back to an exit.
- \* Based on "Kitchen Fire Safety Tips" published by NFPA.

## CAUTION

1. To reduce risk of fire and to properly exhaust air, be sure to duct air outside. Do not vent exhaust air into spaces within walls or ceilings or into attics, crawl spaces, or garages.
2. Take care when using cleaning agents or detergents.
3. Avoid using food products that produce flames under the Range Hood.
4. For general ventilating use only. Do not use to exhaust hazardous or explosive materials and vapors.
5. To avoid motor bearing damage and noisy and/or unbalanced impellers, keep drywall spray, construction dust, etc. off power unit.
6. Your hood motor has a thermal overload which will automatically shut off the motor if it becomes overheated. The motor will restart when it cools down. If the motor continues to shut off and restart, have the hood serviced.
7. For best capture of cooking impurities, the bottom of the hood should be a minimum of 24" and a maximum of 30" above the cooking surface.
8. Two installers are recommended because of the large size and weight of this hood.
9. Please read specification label on product for further information and requirements.

## PREPARE THE HOOD

Unpack hood and check contents.

You should receive:

- 1 - Hood
- 1 - Decorative Flue Assembly
- 1 - Parts Bag containing:
  - 2 - Mounting Brackets
  - 1 - Flue Mounting Bracket
  - 10 - Mounting Screws (4,8 x 38mm Pan Head)
  - 2 - Mounting Screws (3,9 x 9,5mm Pan Head)
  - 10 - Drywall Anchors
- 1 - Installation Instructions

## INSTALL THE DUCTWORK

**NOTE: To reduce the risk of fire, use only metal ductwork.**

1. Decide where the ductwork will run between the hood and the outside.
2. A straight, short duct run will allow the hood to perform most efficiently.
3. Long duct runs, elbows, and transitions will reduce the performance of the hood. Use as few of them as possible. Larger ducting may be required for best performance with longer duct runs.
4. Install a roof or wall cap. Connect round metal ductwork to cap and work back towards hood location. Use duct tape to seal the joints between ductwork sections.

## INSTALL MOUNTING BRACKETS

1. Construct wood wall **framing** that is flush with interior surface of wall studs. Make sure:
  - a) the framing is centered over installation location.
  - b) the height of the framing will allow the **mounting brackets** to be secured to the framing within the dimensions shown.
2. After wall surface is finished, secure mounting brackets to framing using dimensions shown.

## INSTALL THE HOOD

1. Hang the hood from the brackets through the **rectangular cut-outs** on the back of the hood. Cut-outs are larger than the brackets to allow for horizontal adjustment. The bottom of the hood should be 24" to 30" above the cooking surface.
2. **Height adjustment screws** provide vertical adjustment.
3. **Depth adjustment screws** provide horizontal adjustment.
4. Secure the hood with **mounting screws**. Use drywall anchors, provided, if wall studs or framing are not available.

## WIRING

**Note: This range hood must be properly grounded. The unit should be installed by a qualified electrician in accordance with all applicable national and local electrical codes.**

### GROUNDING INSTRUCTIONS

This appliance must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. This appliance is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

**WARNING - Improper grounding can result in a risk of electric shock.**

Consult a qualified electrician if the grounding instructions are not completely understood, or if doubt exists as to whether the appliance is properly grounded. Do not use an extension cord. If the power supply cord is too short, have a qualified electrician install an outlet near the appliance.

Set the electrical power supply within the space covered by the decorative flues. Position the power socket at a maximum distance of 33-7/16" (85 cm) from where the lead exits from the hood (see illustration alongside). Make sure this does not interfere with the decorative flues (where the flue touches the wall).

Fit the plug into the power socket.

## CONNECT DUCTWORK

1. Use screws and drywall anchors (supplied) to secure **flue mounting bracket** to the ceiling and wall as shown.
2. Use **6" round metal duct** to connect the discharge collar on the hood to the ductwork above.
3. Use **duct tape** to make all joints secure and air tight.
4. Insert the decorative flues setting them on the hood.
5. Push the lower flue downwards making it fit properly.
6. Extend the upper flue to the ceiling and secure with two mounting screws.

## MAINTENANCE

---

Proper maintenance of the Range Hood will assure proper performance of the unit.

### Grease Filters

The **grease filters** should be cleaned after every 30 hours of operation. This range hood has an operation timer which will alert you after every 30 hours of use by lighting a red LED above the "blower speed 0-1 button". Use a warm detergent solution. Grease filters are dishwasher safe.

To remove the grease filters: push the filters toward the back of the hood and pull the filters downwards.

### Hood Cleaning

Stainless steel is one of the easiest materials to keep clean. Occasional care will help preserve its fine appearance.

Cleaning tips:

- Hot water with soap or detergent is all that is usually needed.
- Follow all cleaning by rinsing with clear water. Wipe dry with a clean, soft cloth to avoid water marks.
- For discolorations or deposits that persist, use a non-scratching household cleanser or stainless steel polishing powder with a little water and a soft cloth.
- For stubborn cases, use a plastic scouring pad or soft bristle brush together with cleanser and water. Rub lightly in direction of polishing lines or "grain" of the stainless finish. Avoid using too much pressure which may mar the surface.
- **DO NOT** allow deposits to remain for long periods of time.
- **DO NOT** use ordinary steel wool or steel brushes. Small bits of steel may adhere to the surface causing rust.
- **DO NOT** allow salt solutions, disinfectants, bleaches, or cleaning compounds to remain in contact with stainless steel for extended periods. Many of these compounds contain chemicals which may be harmful. Rinse with water after exposure and wipe dry with a clean cloth.

Painted surfaces should be cleaned with warm water and mild detergent only.

## OPERATION

### Controls

The hood is operated using the (5) push-buttons located on the right side of the hood.

The **light switch** turns the halogen lights on and off. Push the light switch once to turn the lights ON - push a second time to turn the lights ON to a brighter level - push a third time to turn the lights OFF.

The **blower on-off / speed 1** switch turns the blower on to its lowest running speed. To turn OFF the blower, push in and hold this blower switch for approximately 2 seconds.

The **blower speed 2** switch turns the blower on to medium-low running speed. Pressing this switch a second time sets a timer which keeps the blower operating at this speed for 10 minutes. The **LED** will blink during this time and the blower will shut off automatically.

The **blower speed 3 and blower speed 4** switches operate the same as blower speed 2 switch except: Blower speed 3 is medium-high and blower speed 4 is high.

After every 30 hours of operation, the LED above the "blower speed 1 switch" will be illuminated (RED) and blink for 30 seconds after turning off the blower. This is a reminder to clean the grease filters. Once the grease filters are cleaned and installed, press in and hold the "light switch" button for approximately 2 seconds during the blink of the LED.

## HALOGEN BULBS

This range hood requires two halogen bulbs (Type MR16, 12V, 20W).

**ALWAYS SWITCH OFF THE ELECTRICITY SUPPLY BEFORE CARRYING OUT ANY OPERATIONS ON THE APPLIANCE.**

To change bulbs:

1. Loosen the ring nut by turning it counterclockwise.
2. Pull the bulb downwards to remove - **DO NOT ROTATE. CAUTION: BULB MAY BE HOT!**
3. Replace with Type MR16, 12 volt, 20 watt halogen bulb.

## FUSE REPLACEMENT

### SWITCH OFF THE ELECTRICITY SUPPLY.

Remove the grease filters.

Open the electrical box.

Replace with the same type of fuse (5x20mm, 4A, 125V).

## WARRANTY

### BROAN-NUTONE LLC ONE YEAR LIMITED WARRANTY

Broan-NuTone LLC warrants to the original consumer purchaser of its products that such products will be free from defects in materials or workmanship for a period of one year from the date of original purchase. THERE ARE NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

During this one-year period, Broan-NuTone LLC will, at its option, repair or replace, without charge, any product or part which is found to be defective under normal use and service.

THIS WARRANTY DOES NOT EXTEND TO FLUORESCENT LAMP STARTERS, TUBES, HALOGEN AND INCANDESCENT BULBS. This warranty does not cover (a) normal maintenance and service or (b) any products or parts which have been subject to misuse, negligence, accident, improper maintenance or repair (other than by Broan-NuTone LLC), faulty installation or installation contrary to recommended installation instructions.

The duration of any implied warranty is limited to the one-year period as specified for the express warranty. Some states do not allow limitation on how long an implied warranty lasts, so the above limitation may not apply to you.

BROAN-NUTONE LLC'S OBLIGATION TO REPAIR OR REPLACE, AT BROAN-NUTONE LLC'S OPTION, SHALL BE THE PURCHASER'S SOLE AND EXCLUSIVE REMEDY UNDER THIS WARRANTY. BROAN-NUTONE LLC SHALL NOT BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES ARISING OUT OF OR IN CONNECTION WITH PRODUCT USE OR PERFORMANCE. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. This warranty supersedes all prior warranties.

To qualify for warranty service, you must (a) notify Broan-NuTone LLC at the address stated below or telephone: 1-800-637-1453, (b) give the model number and part identification and (c) describe the nature of any defect in the product or part. At the time of requesting warranty service, you must present evidence of the original purchase date.

**Broan-NuTone LLC**, 926 West State Street, Hartford, WI 53027 (1-800-637-1453)

**NuTone, Inc.**, 4820 Red Bank Road, Cincinnati, OH 45227 (1-800-543-8687)

**Broan-NuTone Canada, Inc.**, 1140 Tristar Drive, Mississauga, Ontario, L5T 1H9 (1-888-882-7626)

# LISEZ ET CONSERVEZ CES INSTRUCTIONS

## AVERTISSEMENTS

PEUT ÊTRE UTILISÉ DANS LES ZONES CUISSON DES CUISINES FAMILIALES.

POUR REDUIRE LES RISQUES D'INCENDIE, DE DECHARGES ELECTRIQUES OU DE DOMMAGES AUX PERSONNES, OBSERVEZ LES INSTRUCTIONS SUIVANTES:

1. N'utilisez cet appareil que comme cela est indiqué par le constructeur. Si vous avez des problèmes, contactez le fabricant à l'adresse ou au numéro de téléphone indiqués dans la garantie.
2. Avant de pourvoir à l'entretien ou au nettoyage de votre appareil, éteignez-le au tableau des commandes ou bloquez le tableau des commandes afin d'éviter de le mettre en marche accidentellement. Si vous ne pouvez pas bloquer le système permettant d'éteindre votre appareil, appliquez un avertissement extérieur d'une façon sûre, comme par exemple un panneau, sur le tableau des commandes.
3. L'assemblage et la connexion électrique doivent être faits par des personnes qualifiées en respectant les normes et règlements en vigueur, y compris les normes et règlements concernant les possibilités d'incendie.
4. Il est indispensable qu'il y ait suffisamment d'air pour que la combustion et l'évacuation des gaz à travers le tuyau du brûleur du combustible ait lieu sans retour de flamme. Suivez les indications données par le fabricant du brûleur ainsi que les normes de sécurité comme celles qui sont publiées par l'Association Nationale pour la Protection contre les Incendies National Fire Protection Association (NFPA) et la American Society for Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), et les autorités locales en matière de normes.
5. Quand vous coupez ou percez des trous dans le mur ou le plafond, n'abîmez pas les fils électriques ou autres.
6. Le ventilateur canalisé doit toujours évacuer l'air vers l'extérieur.
7. N'utilisez pas cet appareil avec un appareil contrôlant la vitesse à état solide.
8. Afin de diminuer tout risque d'incendie n'utilisez que des conduits en métal.
9. Votre appareil doit être relié à la terre.

**ATTENTION - POUR REDUIRE LES RISQUES D'INCENDIE DES MATIERES GRASSES QUI SONT EN TRAIN DE CUIRE:**

- A. Ne laissez jamais ni vos éléments chauffants, ni vos casseroles ou poêles sur le feu sans les contrôler si vous réglez l'apport de chaleur sur une position élevée. Si vos casseroles ou poêles débordent cela provoque de la vapeur et des éclaboussures de graisse qui peuvent prendre feu. Chauffez les huiles lentement à feu bas ou moyen.
- B. Faites toujours fonctionner votre hotte quand vous cuisinez à des températures élevées ou quand vous cuisinez des plats flambés.
- C. Nettoyez régulièrement les ailes de vos ventilateurs. Ne permettez pas que la graisse s'accumule sur le ventilateur ou sur le filtre.
- D. Utilisez des casseroles de taille appropriée. Utilisez toujours des ustensiles de cuisson dont la taille est appropriée à la surface de votre élément de cuisson.

## AVERTISSEMENTS

POUR REDUIRE LES RISQUES DE DOMMAGES AUX PERSONNES AU CAS OÙ VOTRE CUISINIÈRE PRENDRAIT FEU, OBSERVEZ LES INSTRUCTIONS SUIVANTES:\*

1. ETEINDRE LES FLAMMES à l'aide d'un couvercle le plus hermétique possible, une plaque à gâteaux, ou un plateau en métal, puis éteindre le brûleur. ATTENTION à NE PAS VOUS BRÛLER. Si les flammes ne s'éteignent pas immédiatement, SORTEZ ET APPELEZ LES POMPIERS.
2. NE PRENEZ JAMAIS EN MAIN UNE POËLE OU UNE CASSEROLE QUI A PRIS FEU - Vous pourriez vous brûler.
3. N'UTILISEZ PAS D'EAU, ni torchons ou serviettes mouillés - vous provoqueriez une violente explosion de vapeur.
4. Utilisez un extincteur SEULEMENT si:
  - A. Vous savez que vous avez un extincteur Classe ABC, et vous en connaissez déjà le mode d'emploi.
  - B. Ce n'est pas un très gros incendie et qu'il se limite à l'endroit où il a explosé.
  - C. Vous êtes en train d'avertir les pompiers.
  - D. Vous avez la possibilité d'essayer d'éteindre l'incendie en ayant le dos tourné vers une issue.

\* D'après les "Suggestions concernant la Sécurité contre les incendies des cuisines" publiées par NFPA.

## ATTENTION

1. Pour réduire tout risque d'incendie et pour évacuer correctement l'air, assurez-vous de prévoir un conduit de ventilation extérieur. Ne videz pas l'air dans les espaces limités par des murs ou des plafonds, les combles, les passages étroits ou les garages.
2. Faites très attention quand vous utilisez des produits de nettoyage ou des détergents.
3. Évitez d'utiliser des aliments pouvant s'enflammer sous la Range Hood.
4. N'utilisez cet appareil que pour une ventilation générale. Ne l'utilisez pas pour évacuer des matières ou des vapeurs dangereuses ou qui peuvent exploser.
5. Pour éviter de causer des dommages au moteur et de rendre les rotors bruyants et/ou non équilibrés, évitez que les sprays pour murs secs, la poussière de construction entrent en contact avec la partie électrique.
6. Le moteur de votre hotte a un thermostat qui éteindra automatiquement le moteur s'il est surchauffé. Le moteur se remettra en marche lorsqu'il se sera refroidi. Si le moteur continue à s'éteindre et à se remettre en marche, faites vérifier votre hotte.
7. Pour mieux capturer les impuretés de cuisine, le bas de votre hotte devrait être à une distance minimum de 24" et à une distance maximum de 30" au-dessus du plan de cuisson.
8. Vu que cette hotte est grande et lourde, il est recommandé de confier l'installation de cette hotte à deux personnes.
9. Nous vous recommandons de lire l'étiquette indiquant les caractéristiques de votre hotte pour de plus amples informations et exigences.
