- (b) Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.
- (c) Do not operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the: (1) door (bent), (2) hinges and latches (broken or loosened), (3) door seals and sealing surfaces.

# IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances basic safety precautions should be followed, including the following:

**WARNING** - To reduce the risk of burns, electric shock, fire, injury to persons or exposure to excessive microwave energy:

1. Read all instructions before using the appliance.
2. Read and follow the specific **"PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY"** on page 1.
3. This appliance must be grounded. Connect only to properly grounded outlet. See **"GROUNDING INSTRUCTIONS"** on page 5.
4. Install or locate this appliance only in accordance with the provided installation instructions.
5. Some products such as whole eggs and sealed containers -- for example, closed glass jars -- may explode and should not be heated in this oven.
6. Use this appliance only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in this appliance. This type of oven is specifically designed to heat, cook or dry food. It is not designed for industrial or laboratory use.
7. As with any appliance, close supervision is necessary when used by children.
8. Do not operate this appliance if it has a damaged cord or plug, if it is not working properly or if it has been damaged or dropped.
9. This appliance should be serviced only by qualified service personnel. Contact nearest Sharp Authorized Servicer or Dealer for examination, repair or adjustment.
10. Do not cover or block any openings on the appliance.
11. Do not store or use this appliance outdoors. Do not use this product near water--for example, near a kitchen sink, in a wet basement or near a swimming pool, and the like.
12. Do not immerse cord or plug in water.
13. Keep cord away from heated surfaces.
14. Do not let cord hang over edge of table or counter.
15. See door surface cleaning instructions on page 22.
16. To reduce the risk of fire in the oven cavity:
  - a. Do not overcook food. Carefully attend appliance if paper, plastic or other combustible materials are placed inside the oven to facilitate cooking.
  - b. Remove wire twist-ties from paper or plastic bags before placing bag in oven.
  - c. **If materials inside the oven should ignite, keep oven door closed, turn oven off and disconnect the power cord or shut off power at the fuse or circuit breaker panel.**
  - d. Do not use the cavity for storage purposes. Do not leave paper products, cooking utensils or food in the cavity when not in use.
17. Clean ventilation openings and grease filters frequently – Grease should not be allowed to accumulate on ventilation openings, hood (louver) or grease filters.
18. Use care when cleaning the louver and the grease filters. Corrosive cleaning agents, such as lye-based oven cleaners, may damage the louver and the grease filters.
19. When foods flame under the grease filters, turn the fan off by pushing the FAN button, if possible, or by turning power off at the circuit breaker box. The fan cannot be turned off manually if it had started as a result of heat rising from range units or burners. The fan, if operating, may spread the flame.
20. This appliance is suitable for use above both gas and electric cooking equipment 36" wide or less.
21. **The deflector, item 15 on page 9, is provided for protection against flaming foods from range below and should remain in place at all times. See installation instructions for proper mounting procedures.**

**SAVE THESE INSTRUCTIONS**

# UNPACKING INSTRUCTIONS

## Unpacking and Examining Your Oven

Carefully remove oven from carton. **SAVE THE CARTON AS IT MAY MAKE INSTALLATION EASIER.**

Remove:

1. all packing materials from inside the oven cavity. Check to see that there are Installation Instructions, Wall Template and Top Template. Read enclosures and **SAVE** the Operation Manual.
2. the feature sticker from the outside of the door, if there is one.

Check the oven for any damage, such as misaligned or bent door, damaged door seals and sealing surfaces, broken or loose door hinges and latches and dents inside the cavity or on the door. If there is any damage, do not operate the oven and contact your dealer or SHARP AUTHORIZED SERVICER.

See Installation Instructions for more details.

# OPTIONAL ACCESSORIES

Two optional accessories are available for this oven:

1. Charcoal Filter Kit (RK-220). This is required when hood exhaust is recirculated. See Charcoal Filter Kit on page 23. If your dealer does not stock this item, it can be ordered by calling 1-800-BE-SHARP.
2. Filler Panel Kit. For use when the oven is installed in a 36-inch or 42-inch wide opening. The metal filler panels come in pairs, each 3-inches wide. For information contact:  
Modern-Aire Manufacturing Corporation  
7319 Lankershim Blvd.

# GROUNDING INSTRUCTIONS

This appliance must be grounded. This oven is equipped with a cord having a grounding wire with a grounding plug. It must be plugged into a wall receptacle that is properly installed and grounded in accordance with the National Electrical Code and local codes and ordinances. In the event of an electrical short circuit, grounding reduces risk of electric shock by providing an escape wire for the electric current.

**WARNING** – Improper use of the grounding plug can result in a risk of electric shock.

## Electrical Requirements

Check Installation Instructions for proper location for the power supply. The electrical requirements are a 120 volt 60 Hz, AC only, 15 amp. or more protected electrical supply. It is recommended that a separate circuit serving only the oven be provided.

The oven is equipped with a 3-prong grounding plug. It must be plugged into a wall receptacle that is properly installed and grounded. **DO NOT UNDER ANY CIRCUMSTANCES CUT OR REMOVE THE GROUNDING PIN FROM THE PLUG.**

Note:

1. If you have any questions about the grounding or electrical instructions, consult a qualified electrician or service person.
2. Neither Sharp nor the dealer can accept any liability for damage to the oven or personal injury resulting from failure to observe the correct electrical connection procedures.

## Radio or TV Interference

Should there be any interference caused by the microwave oven to your radio or TV, check that the microwave oven is on a different electrical circuit, relocate the radio or TV as far away from the oven as feasible or check position and signal of receiving antenna.

# INFORMATION YOU NEED TO KNOW

## ...About Your Oven

This Operation Manual is valuable: read it carefully and always save it for reference.

A good microwave cookbook is a valuable asset. Check it for microwave cooking principles, techniques, hints and recipes. See the order form on page 27 for ordering the Ultimate Accessory, the SHARP CAROUSEL MICROWAVE COOKBOOK.

**NEVER** use the oven without the turntable and support nor turn the turntable over. This oven can be used both with the turntable turning and with the turntable not turning for large casserole type dishes. See page 12 for complete instructions.

**ALWAYS** have food in the oven when it is on to absorb the microwave energy.

When using the oven at power levels below 100%, you may hear the magnetron cycling on and off.

Condensation is a normal part of microwave cooking. Room humidity and the moisture in food will influence the amount of moisture that condenses in the oven. Generally, covered foods will not cause as much condensation as uncovered ones. Ventilation openings must not be blocked.

The oven is for food preparation only. It should not be used to dry clothes or newspapers.

Your oven is rated 850 watts using the IEC 705-1988 method. In using recipes or package directions, check food at the minimum time and add time accordingly.

# INFORMATION YOU NEED TO KNOW

## ...About Microwave Cooking

- \* Arrange food carefully. Place thickest areas toward outside of dish.
- \* Watch cooking time closely. Cook for the shortest amount of time indicated and add more as needed. Food severely overcooked can smoke or ignite.
- \* Cover foods while cooking. Check recipe or cookbook for suggestions: paper towels, wax paper, microwave plastic wrap or a lid. Covers prevent spattering and help foods to cook evenly.
- \* Shield with small flat pieces of aluminum foil any thin areas of meat or poultry to prevent overcooking before dense, thick areas are cooked thoroughly.
- \* Stir foods from outside to center of dish once or twice during cooking, if possible.
- \* Turn foods over once during microwaving to speed cooking of such foods as chicken and hamburgers. Large items like roasts must be turned over at least once.
- \* Rearrange foods like meatballs halfway through cooking both from top to bottom and from the center of the dish to the outside.
- \* Add standing time. Remove food from oven and stir, if possible. Cover for standing time which allows the food to finish cooking without overcooking.
- \* Check for doneness. Look for signs indicating that cooking temperatures have been reached. Doneness signs include:
  - \* Food steams throughout, not just at edge.
  - \* Center bottom of dish is very hot to the touch.
  - \* Poultry thigh joints move easily.
  - \* Meat and poultry show no pinkness.
  - \* Fish is opaque and flakes easily with a fork.

## ...About Safety

- \* Check foods to see that they are cooked to the United States Department of Agriculture's recommended temperatures.

TEMP	FOOD
160°F	...for fresh pork, boneless white meat of poultry, ground meat, fish, seafood, egg dishes and frozen prepared food.
165°F	...for leftover, ready-to-reheat refrigerated and deli and carry-out "fresh" food.
170°F	...white meat of poultry.
180°F	...dark meat of poultry.

To test for doneness, insert a meat thermometer in a thick or dense area away from fat or bone. Never leave the thermometer in the food during cooking, unless it is approved for microwave oven use.

- \* ALWAYS use potholders to prevent burns when handling utensils that are in contact with hot food. Enough heat from the food can transfer through utensils to cause skin burns.
- \* Avoid steam burns by directing steam away from the face and hands. Slowly lift the farthest edge of a dish's covering and carefully open popcorn and oven cooking bags away from the face.
- \* Stay near the oven while it's in use and check cooking progress frequently so that there is no chance of overcooking food.
- \* NEVER use the cavity for storing cookbooks or other items.
- \* Select, store and handle food carefully to preserve its high quality and minimize the spread of foodborne bacteria.
- \* Keep wave guide cover clean. Food residue can cause arcing and/or fires.

# INFORMATION YOU NEED TO KNOW

## ...About Utensils and Coverings

It is not necessary to buy all new cookware. Many pieces already in your kitchen can be used successfully in your new microwave.

Use these utensils for safe microwave cooking and reheating:

- \* glass ceramic (Pyroceram®), such as Corningware®.
- \* heat-resistant glass (Pyrex®)
- \* microwave-safe plastics
- \* paper plates
- \* microwave-safe pottery, stoneware and porcelain
- \* browning dish (Do not exceed recommended preheating time. Follow manufacturer's directions.)

These items can be used for short time reheating of foods that have little fat or sugar in them:

- \* wood, straw, wicker

### DO NOT USE

- \* metal pans and bakeware
- \* dishes with metallic trim
- \* non-heat-resistant glass
- \* non-microwave-safe plastics (margarine tubs)
- \* recycled paper products
- \* brown paper bags
- \* food storage bags
- \* metal twist-ties

Should you have questions about utensils or covering, check a good microwave cookbook or follow recipe suggestions.

### ACCESSORIES

There are many microwave accessories available for purchase. Evaluate carefully before you purchase so that they meet your needs. A microwave-safe thermometer will assist you in determining correct doneness and assure you that foods have been cooked to safe temperatures. Sharp is not responsible for any damage to the oven when accessories are used.

Should you wish to check if a dish is safe for microwaving, place the empty dish in the oven and microwave on HIGH for 30 seconds. A dish which becomes very hot should not be used.

The following coverings are ideal:

- \* Paper towels are good for covering foods for reheating and absorbing fat while cooking bacon.
- \* Wax paper can be used for cooking and reheating.
- \* Plastic wrap that is specially marked for microwave use can be used for cooking and reheating. DO NOT allow plastic wrap to touch food. Vent so steam can escape.
- \* Lids that are microwave-safe are a good choice because heat is kept near the food to hasten cooking.
- \* Oven cooking bags are good for large meats or foods that need tenderizing. DO NOT use metal twist-ties. Remember to slit bag so steam can escape.

How to use aluminum foil in your microwave oven:

- \* Small flat pieces of aluminum foil placed smoothly on the food can be used to shield areas that are either defrosting or cooking too quickly.
- \* Foil should not come closer than one inch to any surface of the oven.

## ...About Children and the Microwave

\* Children below the age of 7 should use the microwave with a supervising person very near to them. Between the ages of 7 and 12, the supervising person should be in the same room.

\* The child must be able to reach the oven comfortably; if not, he/she should stand on a sturdy stool.

\* At no time should anyone be allowed to swing on or pull down on the oven door.

\* Children should be taught all safety precautions: use potholders, remove coverings carefully, pay special attention to packages that crisp food because they may be extra hot.

\* Don't assume that because a child has mastered one cooking skill he/she can cook everything.

\* Children need to learn that the microwave oven is not a toy.

## MANUAL OPERATION

### Time Cooking

Your oven can be programmed for 99 minutes 99 seconds (99 99). Always enter the seconds after the minutes, even if they are both zeros.

- Suppose you want to cook for 5 minutes at 100%.

Procedure	Display
<p><b>5 0 0</b></p> <p>1. Enter cooking time.</p>	 TURNTABLE ON

## MANUAL OPERATION

### Turntable On / Off

For most cooking, the turntable should be on; however the turntable can be turned off so that it does not rotate when extra large dishes, such as the popular 13 x 9 x 2 glass utility casserole, are used. The casserole should be placed on the turntable so that it is level.

\* Suppose you want to cook lasagna in a 13 x 9 x 2 casserole for 45 minutes on 40% power.

Procedure	Display
<b>1</b> <span style="border: 1px solid black; padding: 2px;">TURNTABLE ON / OFF</span> Touch TURNTABLE ON/OFF pad and note TURNTABLE OFF in the display.	TURNTABLE OFF
<b>2</b> <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">4</span> <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">5</span> <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">0</span> <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">0</span> Enter cooking time.	45 00 TURNTABLE OFF
<b>3</b> <span style="border: 1px solid black; padding: 2px;">POWER LEVEL</span> <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">4</span> Enter Power level.	P- 40 TURNTABLE OFF
<b>4</b> <span style="border: 1px solid black; padding: 2px;">START</span> Touch START pad.	45.00 COOK TURNTABLE OFF

#### NOTE:

The door can be opened for checking food and the turntable will stay in the off position. After checking, close door and touch START.

The turntable will stay off for one minute after door is opened when time-of-day appears in the display. It is possible to reprogram the oven during that minute without touching the TURNTABLE ON/OFF pad. The display always indicates whether the turntable is off or on.

THE TURNTABLE SHOULD ALWAYS BE ON WHEN USING THE SPECIAL FEATURES. Only manual operation is available when the turntable is off.

When cooking large quantities of food which cannot be stirred, it is best to use a lower power level such as 40 or 50%. You may speed cooking of large amounts by programming 5 to 10 minutes on 100% power (HIGH) followed by the desired time on lower power. See page 19 for how to program multiple sequences. You may wish to reverse a large casserole once during cooking; simply open door, reposition casserole, close door and touch START.

## SPECIAL FEATURES

### Sensor Cooking

Sharp's Sensor is a semi-conductor device that detects the vapor (moisture and humidity) emitted from the food as it heats. The Sensor adjusts the cooking times and power level for various foods and quantities. It takes the guesswork out of microwave cooking.

#### Using Sensor Settings:

1. Room temperature should not exceed 95° F.
2. Be sure the exterior of the cooking container and the interior of the oven are dry. Wipe off any moisture with a dry cloth or paper towel.
3. Sensor cooking can only be entered within 1 minute after cooking, opening and closing the door or touching the STOP/CLEAR pad.
4. During the first part of sensor cooking, SE-, SENSOR, FRON, RE-, HEAT, PAD, TURN will appear on display. Do not open the oven door or touch STOP/CLEAR during this part of the cooking cycle. The measurement of vapor will be interrupted. If this occurs, ERRR will appear and sensor cooking will be interrupted. To continue cooking, touch the STOP/CLEAR pad and select cooking time and power. When sensor detects the vapor emitted from the food, remainder of cooking time will appear. Door may be opened when remaining cooking time appears on display. At this time, you may stir or season food, as desired.
5. Check food for doneness after cooking with sensor settings. If additional time is needed, continue to cook with variable power and time.
6. If the sensor does not detect vapor, ERRR will appear and the oven will shut off.
7. At the end of any cycle, open oven door or touch STOP/CLEAR pad. The time of day will reappear on the display.
8. Any Sensor setting can be programmed with More or Less Time Adjustment. See page 20.

#### Selecting Foods:

1. The sensor works with foods at normal storage temperature. For example, foods for reheating would be at refrigerator temperature and potatoes for baking would be room temperature.
2. More or less food than the quantity listed in the charts should be cooked by time and variable power.

#### Covering Foods:

Some foods work best when covered. Use the cover recommended in the chart for these foods.

1. Casserole lid.
2. Plastic wrap: Use plastic wrap recommended for microwave cooking. Cover dish loosely; allow approximately 1/2 inch to remain uncovered to allow steam to escape. Plastic wrap should not touch food.
3. Paper towel: Use paper towels to absorb excess fat and moisture when cooking bacon and potatoes. Line the turntable when baking potatoes.
4. Wax paper: Cover dish completely; fold excess wrap under dish to secure. If dish is wider than paper, overlap two pieces at least one inch to cover.

## Instant Sensor Chart

Frozen Entree	6-16 oz.	Use this pad for frozen convenience foods. It will give satisfactory results for most brands. You may wish to try several and choose your favorite. Remove package from outer wrapping and follow package directions for covering. After cooking, let stand, covered, for 1 to 3 minutes.
Sensor Reheat Leftovers such as rice, potatoes, vegetables, casserole	4-32 oz.	Place in dish or casserole slightly larger than amount to be reheated. Flatten, if possible. Cover with lid, plastic wrap or wax paper. Use covers such as plastic wrap or lids with larger quantities of more dense foods such as stews. After reheating, stir well, if possible. Foods should be very hot. If not, continue to heat with variable power and time. After stirring, re-cover and allow to stand 2 to 3 minutes.
Soup	1-4 cups	
Canned entrees and vegetables	4-16 oz.	
Hot dogs	1-2	Place hot dog in bun and wrap in paper towel or paper napkin.
Dinner plate	1 plate (3-6 oz. plus vegetables and/ or potato/ rice)	Place meaty portions and bulky vegetables to outside of plate. Cut large items like baked potatoes into smaller pieces. Flatten foods such as mashed potato and other dense foods. Cover with wax paper or plastic wrap. After cooking, check that food is very hot throughout and that the bottom center of the plate is very hot. If not, continue heating using time and power level. Stand, covered, 2 to 3 minutes.
Popcorn	Only 1 package at a time, any size bag	Use only popcorn packaged for microwave oven use. Try several brands to decide which you like best. Fresh popcorn works best so purchase only the amount used in a week or two. Do not try to pop unpopped kernels. More or Less Time Adjustment can be used to provide adjustment needed for older popcorn or individual tastes.
Baked Potatoes		
White potatoes	1-6 medium	Prick with a fork. Place on paper-towel-lined turntable. After cooking, remove from oven, wrap in aluminum foil and let stand 5 to 10 minutes.

## CompuDefrost

CompuDefrost automatically defrosts ground meat, chicken pieces, steaks, fish, chops, whole chicken and roasts.

Round the weight to the nearest half pound. (Ex. if the steak's actual weight is 2.2 lbs., round to 2.0 lbs. If the steak's weight is 2.4 lbs., round to 2.5 lbs.)

To enter weight, touch the COMPU DEFROST pad for a .5 lb. increase per touch. (Ex. touch four times for 2.0 lbs.)

\* Suppose you want to defrost a 2.2 lb. steak .

Procedure	Display
<p><b>1</b> Round the weight to 2.0 lbs. Quickly touch COMPU DEFROST 4 times for 2.0 lbs. because the oven starts automatically.</p> <p>The oven will stop and directions will be displayed. Follow the indicated message.</p>	<p>COMPU DEFROST x 4</p> <p>COMPU DEFROST 2.0</p> <p>TURNTABLE ON LBS.</p>

<p><b>2</b> After the 1st stage, open the door. Turn steak over and shield any warm portions. Close the door.</p> <p>START</p> <p>Touch START pad.</p>	<p>CHEK</p> <p>TURN OVER</p> <p>PRESS START</p>
<p><b>3</b> After the 2nd stage, open the door. Shield any warm portions. Close the door.</p> <p>START</p> <p>Touch START pad.</p>	<p>CHEK</p> <p>PRESS START</p>
<p><b>4</b> After cooking.</p>	<p>COVER STAND</p>

### NOTE:

1. CompuDefrost can be programmed with More or Less Time Adjustment. See page 20.
2. You may choose to enter the weight in tenths of pounds. This procedure may be easier with larger weights such as 4 pounds because it requires fewer touches. To program, touch COMPU DEFROST and enter weight by touching the number pads. Example: touch COMPU DEFROST then 4 and 0 for a weight of four pounds.
3. To defrost other foods or foods above or below the weights allowed on the chart below, use time and 30% power. See Manual Defrost on page 18.

## CompuDefrost Chart

Food	Amount	Procedure
Roast	2.5-6.0 lbs.	Start with fat side down. After each stage of defrost cycle, turn over and shield the warm portions with aluminum foil. Stand, covered 30-60 minutes.
Steaks, Chops, Fish	0.5-4.0 lbs.	After each stage of defrost cycle, rearrange and if there are warm or thawed portions, shield with small flat pieces of aluminum foil. Remove any that are nearly defrosted. Stand, covered 10-20 minutes.
Ground meat	0.5-3.0 lbs.	Remove any thawed pieces after each stage. Stand, 5-10 minutes.
Chicken, whole	2.5-6.0 lbs.	Remove giblets before freezing poultry. Start with breast side down. After the 1st stage, turn over and shield the warm portions with aluminum foil. After the 2nd stage, if there are warm portions, shield with aluminum foil. Stand, covered 30-60 minutes.
Chicken pieces	0.5-3.0 lbs.	After each stage of defrost cycle, if there are warm or thawed portions, rearrange or remove. Stand, 10-20 minutes.

NOTE: Check foods when oven signals. After final stage, small sections may still be icy. Let stand to continue thawing. Do not defrost until all ice crystals are thawed. Shielding roasts and steaks prevents cooking from occurring before the center of the food is defrosted. Use small smooth strips of aluminum foil to cover edges and thinner sections of the food.

# SPECIAL FEATURES

## Manual Defrost

If the food that you wish to defrost is not listed on the COMPU DEFROST CHART or is above or below the limits in the "Amount" column on the chart, you need to defrost manually.

You can defrost any frozen food, either raw or previously cooked, by using Power Level 3. Follow the exact 3-step procedure found under Time Cooking on page 11. Estimate defrosting time and press 3 for 30% when you select the power level.

For either raw or previously cooked frozen food, the rule of thumb is approximately 5 minutes per pound. For example, defrost 5 minutes for 2-3 cups of casserole or 1 pound of frozen spaghetti sauce.

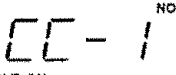

Always stop the oven periodically to remove or separate the portions that are defrosted. If food is not defrosted at the end of the estimated defrosting time, program the oven in 1 minute increments on Power Level 3 until totally defrosted.

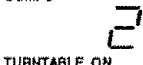

When using plastic containers from the freezer, defrost only long enough to remove from the plastic in order to place food in a microwave-safe dish.

- Suppose you want to start cooking a stew for 20 minutes on 50% at 4:30. Before setting, check to make sure the clock is showing the correct time of day.

Procedure	
1	④ ③ ① Enter the start time.
2	 Touch AUTO START/CLOCK pad.
3	② ① ① ①  ⑤ Enter cooking program.
4	 Touch START pad.

- NOTE: 1. Auto Start can be used for **manual cooking** and **CompuCook**.
2. If the oven door is opened after programming Auto Start, it is necessary to touch the START pad for the time of day to appear in the readout so that the oven will automatically begin programmed cooking at the chosen Auto Start time.
  3. Be sure to choose foods that can be left in the oven safely until the Auto Start time. Baked potatoes are often a good choice.

### Audible Signal Elimination

If you wish to have the oven operate with no audible signals, touch AUTO START/CLOCK, the number ⑤ and START.

To cancel and restore the audible signal, touch AUTO START/CLOCK, the number ⑤ and STOP/CLEAR.

### More or Less Time Adjustment

#### More

Should you discover that you like any of the Instant Sensor, Sensor Cook, CompuCook or CompuDefrost settings slightly **more** done, touch the **POWER LEVEL** pad **once** after touching your choice of pads.

#### Less

Should you discover that you like any of the Instant Sensor, Sensor Cook, CompuCook or CompuDefrost settings slightly **less** done, touch the **POWER LEVEL** pad **twice** after touching your choice of pads.

The **POWER LEVEL** pad must be touched within 1 second of touching your choice of pads.

### Safety Lock

The Safety Lock prevents unwanted oven operation such as by small children.

The control panel can be deactivated or locked. To set, touch AUTO START/CLOCK, the number ① and START.  will appear in the display.

To cancel, touch AUTO START/CLOCK, the number ① and STOP/CLEAR.

### Demonstration Mode

To demonstrate, touch AUTO START/CLOCK, ⑤ and START.  will appear in the display. Cooking operations and special features can now be demonstrated with no power in the oven. For example, touch MINUTE PLUS and the display will show  and count down quickly to 0 and the "End".

To cancel, touch AUTO START/CLOCK, then ⑤ and STOP/CLEAR.

# SERVICE CALL CHECK

Please check the following before calling for service:

1. Place one cup of water in a glass measuring cup in the oven and close the door securely.  
Operate the oven for two minutes at HIGH 100%.
  - A. Does the light come on in the oven? YES \_\_\_\_\_ NO \_\_\_\_\_
  - B. Does the cooling fan work? YES \_\_\_\_\_ NO \_\_\_\_\_  
(Put your hand over the top ventilation openings.)
  - C. Does the turntable rotate when the TURNTABLE ON/OFF pad is touched and TURNTABLE ON is in the display? YES \_\_\_\_\_ NO \_\_\_\_\_  
(It is normal for the turntable to turn in either direction when TURNTABLE ON is in the display.)
  - D. Is the water in the oven hot? YES \_\_\_\_\_ NO \_\_\_\_\_

If "NO" is the answer to any of the above questions, please check electrical outlet, fuse and/or circuit breaker. If both are functioning properly, CONTACT YOUR NEAREST SHARP AUTHORIZED SERVICER. A microwave oven should never be serviced by a "do-it-yourself" repair person.

NOTE: If time appearing in the display is counting down very rapidly, check Demonstration Mode on page 20 and cancel.

# CLEANING AND CARE

## Exterior

The outside surface is precoated metal and plastic. Clean the outside with mild soap and water; rinse and dry with a soft cloth. Do not use any type of household or abrasive cleaner.

## Door

Wipe the window on both sides with a damp cloth to remove any spills or spatters. Metal parts will be easier to maintain if wiped frequently with a damp cloth. Avoid the use of harsh abrasives.

## Touch Control Panel

Care should be taken in cleaning the touch control panel. If the control panel becomes soiled, open the oven door to inactivate the control panel before cleaning. Wipe the panel with a cloth dampened slightly with water only. Dry with a soft cloth. Do not scrub or use any sort of chemical cleaners. Avoid the use of excess water. Close door and touch STOP/CLEAR.

## Interior

Cleaning is easy because no heat is generated to the interior surfaces; therefore, there is no baking and setting of spills or spattering. To clean the interior surfaces, wipe with a soft cloth and warm water. **DO NOT USE ABRASIVE OR HARSH CLEANERS OR SCOURING PADS.** For heavier soil, use baking soda or a mild soap; rinse thoroughly with hot water. The turntable motor shaft is sealed, but excess water or spills should be wiped up immediately.

## Wave Guide Cover

Carefully wash any food particles from the wave guide cover located on the ceiling in the oven cavity.

## Odor Removal

Occasionally, a cooking odor may remain in the oven. To remove, combine 1 cup water, grated peel and juice of 1 lemon and several whole cloves in a 2-cup glass measuring cup. Boil for several minutes using 100% power. Allow to set in oven until cool. Wipe interior with a soft cloth.

## Turntable/Turntable Support

The turntable and turntable support can be removed for easy cleaning. Wash them in mild, sudsy water; for stubborn stains use a mild cleanser and scouring sponge as described above. They are also dishwasher-proof.

## Grease Filters

Filters should be cleaned at least once a month. Never operate the fan or oven without the filters in place.

1. Pull the tab toward the front of the oven, down slightly and remove the filter. Repeat for the other filter.
2. Soak the filters in a sink or dish pan filled with hot water and detergent.  
DO NOT use ammonia or other alkali; they will react with the filter material and darken it.
3. Agitate and scrub with a brush to remove embedded dirt.
4. Rinse thoroughly and shake dry.
5. Replace by fitting the filter back into the opening.

# CLEANING AND CARE

## Fan

The fan will automatically start when heat rises from range surface units or burners. This protects the microwave oven from excessive temperature rise. The fan will stay on until the temperature decreases. It cannot be turned off manually during this time.

For other uses, select either HI or LO speed.

## PRECAUTIONS FOR PROPER USE:

1. DO NOT leave range unattended while using high temperatures. Automatic fan may start and provide excessive air to the surface units. This may cause spattering or boilover.
2. Avoid burning food.
3. Keep grease filters clean.

## Light

1. To replace light bulbs, first disconnect power to the oven at the circuit breaker panel or by unplugging.
2. To release cover remove the screw on the light cover. (See illustration.)
3. Replace bulbs only with Sharp Part Number RLMPTA036WRE0 available from a Sharp Servicer or equivalent 30 watt bulb available at most hardware stores or lighting centers. DO NOT USE A BULB LARGER THAN 30 WATTS.
4. Close light cover and secure with screw removed in step 2.

**CAUTION:** Light cover may become very hot. Do not touch glass when light is on. Do not use light for long time use such as a night light.

## Charcoal Filter Kit

Charcoal Filter Kit, Sharp Part Number RK-220 is used for non-vented, recirculated installation. The filter should be changed every 6 to 12 months depending on use.

1. Disconnect power to the oven at the circuit breaker panel or by unplugging.
2. Remove three louver mounting screws. (See illustration.)
3. Pull the louver away from the unit.
4. Change the charcoal filter.
5. Push louver back in place and replace the screws.

## Oven Light

Remove the louver per instructions 1 - 3 above and charcoal filter, if used.

4. Remove and save one Phillips head screw from oven light cover.
5. Remove old light bulb and replace only with Sharp Part Number RLMPTA030WRE0 available from Sharp Servicer, or equivalent 20 watt light bulb available from most hardware stores and lighting centers. DO NOT USE BULB LARGER THAN 20 WATTS.
6. Replace the oven light cover, Phillips head screw and charcoal filter, if used; push louver back in place and replace the louver mounting screws.
