Why a Napoleon® patio heater

- *Perfect for around the pool and patio*
- *Ideal for cafés and outdoor restaurants*
- *Fits into almost any space*
- *Residential and commercial applications*

Napoleon® patio heaters allow you to extend outdoor activities during the fall and kick off summer several weeks early to enjoy an evening barbecue, early morning coffee, or any other entertaining event. Move the heater to wherever you want the warmth! Napoleon® patio heaters generate infrared radiant heat rays which heat objects rather than the surrounding air, keeping you cozy and warm by the pool, spa or on your deck long after the sun goes down. Infrared heat provides efficient, clean burning performance and uses less fuel while providing ultimate comfort.

Why fight with extension cords, Napoleon's patio heaters operate using a concealed propane cylinder, requiring no electricity; natural gas models are also available to further increase fuel efficiency. The control panels are conveniently placed, and safely out of reach for children.

Napoleon® patio heaters are constructed of stainless steel or cast aluminum, featuring an easy access door on propane models and are designed for permanent outside storage.

The visual appeal and radiant warmth of these modern, long life patio heaters are a welcome feature at popular hotels and resorts, fine restaurants and cafés, golf clubs, spas and ski lodges as well as residential patios. These professional commercial or lifestyle quality heaters are available for your own personal pleasure in the privacy of your own yard. Napoleon® patio heaters will complement any backyard, patio, or pool space. Go ahead, extend your day to the outdoors!

Dare to compare!

Unlike most models available on the market which utilize carbon steel beneath pre-coated finishes, Napoleon's copper and gun metal finishes are pre-coated over 304 stainless steel eliminating the possibility of rust.

Standard Features

- Adjustable heat control
- Wind resistant design
- Directs heat downwards
- Heats up to a 25' diameter
- Stainless steel emitter grids for optimal performance
- Concealed propane tank on LP models
- Aluminum reflector for direct heat

Features & Benefits

R A D I

Commercial

High output, fuel efficient burner

Double Grate Conical Burner provides low energy consumption with high heat output

Easy to use controls

Heavy Duty Outside Perforated Stainless Steel Screen generates infrared rays directing heat where it's needed

Inside "Insulator" Emitter maintains high temperature

Perforated Stainless Steel Screen encases valve for safety and provides cooling and secondary air for combustion

High Output Cast Aluminum Valve allows for maximum 45,000 BTU's, exceeding industry standards

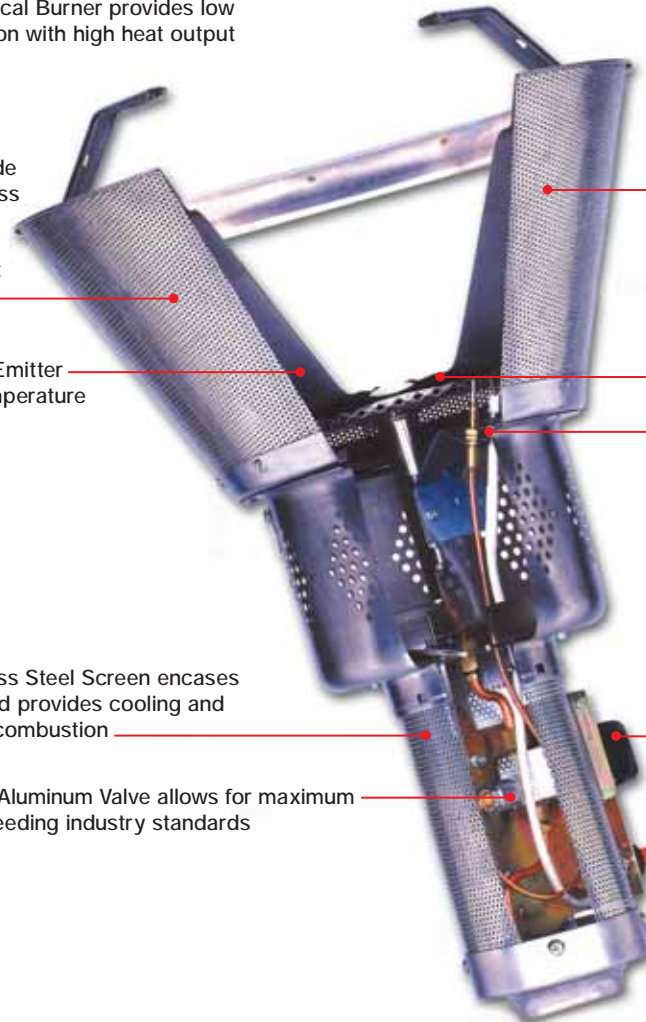

Durable, long lasting cast aluminum valve

Easy roll wheels on LP model for location flexibility

Hold down clamps for extra stability on natural gas models

Dual Cone Shape Emitter directs heat downward allowing for more efficient heat

Heavy Duty Stainless Steel Burner

Direct Electronic Ignition main burner with 100% SAFEGUARD™ shut off

Adjustable Heat Control allows for temperature modulation when less heat is required

Easy Electronic Push Button Start

A 25' diameter of radiant heat casts a warm glow keeping you warm and extending your outdoor enjoyment
