GROUNDING INSTRUCTIONS

It must only be plugged into an outlet that is properly installed and grounded in accordance with all local codes and ordinances.

⚠ WARNING: Improper connection of the equipment-grounding conductor can result in a risk of electrical shock. Check with a qualified electrician or service person if you aren't sure if the outlet is properly grounded. **DO NOT MODIFY THE PLUG.** If it will not fit the outlet, have a proper outlet installed by a qualified electrician. This appliance is designed for use on a nominal 120-volt circuit, and has a grounding attachment plug that looks like the plug in the drawing above. How to Use this Guide

This User's Guide has been designed to help you get the utmost satisfaction from your BISSELL QuickSteamer Lightweight Deep Cleaner. You'll find assembly and operating instructions, safety precautions, as well as maintenance and troubleshooting instructions. Please read this Guide thoroughly before assembling your Deep Cleaner.

Pay particular attention to the product diagram, assembly instructions, and part names. Locate and organize all parts before assembly. Familiarize yourself with the parts and where they go. Following this User's Guide will greatly enhance your ability to get the most performance from your BISSELL QuickSteamer for many years.

Your QuickSteamer comes in three, easy to assemble components:

- Handle assembly
- Upper Handle assembly
- Clean/Solution Tank
- 3 Screws

The only thing you will need to assemble your cleaner is a Phillips head  screwdriver.

Assembling Your QuickSteamer

1. Slide Upper Body into Lower Body.
2. Secure with Screws.
3. Slide Strain Reliever Handle down into Upper Body until it will go no further.
4. Secure with Screw.
5. Place Clean/Solution Tank on back of unit.

Special Features

Clean/Solution Tank - holds 1/2-gallon of hot water and cleaning solution.

Collection Tank - holds 1/2-gallon of dirty water.

Power Cord - for storage, wrap Power Cord around Upper and Lower Cord Wraps, and secure plug to Cord with molded clip.

How to Use Your BISSELL QuickSteamer

Before You Clean

1. Plan activities to give carpet time to dry.
2. Remove easily moved furniture (chairs, lamps, coffee/cocktail tables, etc.) from room if needed.
3. Vacuum carpet thoroughly.
4. Decide where to begin — and end — your job. Clean in 3' X 4' sections, starting in areas farthest from exit. Plan to leave a path open to empty soiled water and refill cleaner.
5. Carpeting will dry in three to four hours, depending on carpet style and air circulation in room. A floor fan speeds drying.
6. Replace furniture on damp carpeting by placing waxed paper under legs until floor dries completely.

Fill the Tank

1. Remove the Clean/Solution Tank by lifting it straight up, then away from the Lower Body.
2. Unscrew the black cap at the bottom of the Clean/Solution Tank.
3. Add one of the BISSELL Advanced Cleaning formulas for Deep Cleaning machines to the formula fill line on the Clean/Solution tank. Fill the rest of the tank with hot (not boiling) tap water to the water fill line. Replace and tighten the black cap.
4. Place Clean/Solution Tank on Lower Body.
5. Rotate Quick Release Cord Wrap™ to release the Power Cord and plug into an outlet.

Pre-Treating

Pre-treat stubborn stains and highly soiled carpet in hallways and other high-traffic areas.

1. Using BISSELL Tough Stain pre-cleaner, generously spray evenly over soiled area, do not overwet carpet.
2. Wait 3 -5 minutes before deep cleaning.

WARNING:

To reduce the risk of fire, use only BISSELL Cleaning Formulas for Deep Cleaning Machines. Use of cleaning formulas that contain lemon or pine oil may damage this appliance and void warranty. Chemical spot cleaners or solvent-based soil removers should not be used. These products may react with the plastic materials used in your QuickSteamer, causing cracking or pitting.

Tip:

Always vacuum thoroughly before you deep clean. If possible, move large furniture to an area you will not be cleaning.

Tip:

Deep cleaning spots, spills and high traffic areas on a regular basis can prolong carpet life.

Carpet Cleaning

1. With your foot, press the red Power Switch [located in foot of unit] ON.
2. With foot, press the Detent Lever on right side of Lower Body.
3. Depress Spray Trigger to spray cleaning solution. **Do not overwet.**
4. To suction up water, repeat motion over same area without depressing Trigger.
5. Repeat Steps 3 and 4 until no more dirt can be removed.
6. Continue to clean entire carpet, working in 3' x 4' sections.
7. Empty the Collection Tank when dirty water reaches the full line, or when the Clean/Solution Tank is empty. See page 8 for instructions.
8. If Floor Nozzle stops spraying, turn Power Switch OFF and check water and cleaning solution levels. Refill if needed.

Hard Floor Cleaning

1. Attach Hard Floor Tool to Unit.
2. Remove the Collection Tank (refer to #3a and b in the Routine Maintenance section on page 8)
 - A. **For 1770/1970 series it is necessary to remove the Cross Action Brush first.**
Using your thumbs squeeze the 2 grey tabs towards the outside of the unit. Push down at the same time and release the Cross Action Brush.
3. Attach the Hard Floor Tool by hooking it into the front of the removable nozzle and swinging it down until the tabs pop into place.
4. Replace the Collection Tank. Be sure to attach the 2 latches.
5. Fill Clean/Solution Tank with BISSELL Hard Floor Solutions™ to FORMULA fill line.
6. Fill Clean/Solution Tank with hot (not boiling) tap water to the WATER fill line.
7. Follow steps 1-8 in Deep Cleaning section above.

Tip:

It is recommended that every time your Clean/Solution Tank is emptied of solution that you empty the contents of the Collection Tank. If the Collection Tank gets too full, you may begin to see foam spitting out of the vent cover. When this happens you will know it is time to empty the Collection Tank.
