Manufactured in China

INFLATING COLEMAN® DOUBLE LOCK™ VALVE:

To begin inflation, open external cap and pull firmly on lanyard to extend out. This will open internal yellow seal.

Attach adapter nozzle to inflation end of pump. Insert pump and turn on.

When fully inflated, seal valve by pushing in with pump nozzle. This will seal the internal yellow stopper and keep air from escaping while closing cap.

Fully remove pump and close external cap. Valve should appear depressed into itself.

DEFLATION

Remove adapter nozzle from inflation end and attach to deflation side of pump. Repeat same steps as inflation. This will draw the air out quickly.

OTHER VALVES:

WORKS WITH STANDARD WIDE OPENING AND BOSTON STYLE VALVES.

Note: For optimum performance, alkaline batteries are recommended.
