## GE Profile™ 7.0 cu. ft. stainless steel capacity electric dryer with Steam and SmartSteam™

### Dimensions and Installation Information (in inches)

Electric Dryer Rating:			
240V	5600W	24A	60Hz
208V	4400W	22A	60Hz

**Exhaust Option:** 4-way rear, right, left and bottom

**Circuit Requirements:** An individual, properly-grounded branch circuit, protected by a 30-amp circuit breaker or a time-delay fuse, is required.

**Note:** Dryer wall outlet must be located within 36" of service cord entry and accessible when dryer is mounted in position.

**Installation Information:** For complete information, see installation instructions packed with your dryer.

## GE Profile™ 7.0 cu. ft. stainless steel capacity electric dryer with Steam and S

For complete information, see installation instructions packed with your dryer.

### Ducting Materials:

For best performance, this dryer should be vented with 4" diameter all rigid metal exhaust duct. If rigid metal duct cannot be used, then UL-listed flexible metal (semi-rigid) ducting can be used (Kit WX08X10077). In special installations, it may be necessary to connect the dryer to the house vent using a flexible metal (foil-type) duct. A UL-listed flexible metal (foil-type) duct may be used ONLY in installations where rigid metal or flexible metal (semi-rigid) ducting cannot be used AND where a 4" diameter can be maintained throughout the entire length of the transition duct. Please see installation instruction packed with your dryer for complete instructions when using flexible metal (foil type) ducting.

### Exhaust Length Calculation:

1. Determine the number of 90° turns needed for your installation. If you exhaust to the side or bottom of dryer, add one turn.
2. The maximum length of 4" rigid (aluminum or galvanized) duct which can be tolerated is shown in the table. A turn of 45° or less may be ignored. Two 45° turns within the duct length should be treated as a 90° elbow. A turn over 45° should be treated as a 90° elbow.

Dryers **must** be exhausted to the outside.

**Caution:** For personal safety do not terminate exhaust into a chimney, under any enclosed house floor (crawl space), or into an attic, since the accumulated lint could create a fire hazard or moisture could cause damage. Never terminate the exhaust into a common duct or plenum with a kitchen exhaust, since the combination of lint and grease could create a fire hazard.

Exhaust ducts should be terminated in a dampered wall cap to prevent back drafts, bird nesting, etc. The wall cap must also be located at least 12" above the ground or any other obstruction with the opening pointed down.

For more information on venting kits and accessories, please call 1-800-GE-CARES.

### Special Installation Requirements

#### Alcove or Closet Installation:

- If your dryer is approved for installation in an alcove or closet, it must be installed on the dryer back.
- The dryer **MUST** be exhausted to the outside.
- Minimum clearances between dryer cabinet and walls: 1" either side; 3" front and rear
- Minimum vertical space from floor to overhead obstruction: 30"
- Closet doors must be louvered or otherwise vented. If installed in a closet, doors must contain a minimum of 120 sq. in. of open area equally distributed. If installed in a room, doors must contain a minimum of 120 sq. in. of open area.
- No other fuel-burning appliance shall be installed in the same room.

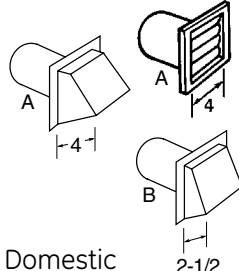

#### Bathroom or Bedroom Installation:

- The dryer **MUST** be exhausted to the outdoors.
- The installation must conform with the local code and the National Electric Code and National Fuel Gas Code.

#### Minimum Clearances other than Alcove or Closet:

- Minimum clearances to combustible surfaces: 1"

#### Dryer Exhausting Information: Use metal duct

Domestic dryer models	Number of 90° turns	Best performance
		Exhaust duct diameter, rigid metal duct, and opening size
	0	Maximum diameter, rigid metal duct, and 90 ft. opening
	1	4" diameter, rigid metal duct, and 60 ft. opening
7.0, 6.0 and 5.8 cu. ft. capacity models	2	4" diameter, rigid metal duct, and 45 ft. opening
all electric dryers	3	4" diameter, rigid metal duct, and 35 ft. opening
	4	4" diameter, rigid metal duct, and 25 ft. opening

## GE Profile™ 7.0 cu. ft. stainless steel capacity electric dryer with Steam and S

### Features and Benefits

- Sensor Dry™ - Continually monitors moisture content to help prevent clothing wear and tear
- Rotary electronic controls with Adaptive Logic - Simplify cycle selection with easy-to-use rotary dial controls Adaptive Logic allows the dryer to adapt to household conditions for efficient performance
- 4 heat selections - Provide the right temperatures for your clothes-drying needs
- Wrinkle Care Extended Tumble - Continues to tumble clothes without heat to help prevent wrinkling and creasing
- Delicates cycle - Low-heat setting helps protect heat-sensitive fabrics, like microfiber and rayon or nylon
- Deluxe dryer rack - Allows tumble-free drying of items like sneakers and stuffed animals
- Up to 90 ft. venting capability - Has long equivalent ducting performance for more flexible installation
- Model PTDN600EMWT - White
