Tips to Avoid Damage to Your Q-Beam Spotlight

- Never attempt to wipe or clean the inner reflective surface of the reflector. Touching or wiping the surface will damage it permanently.
- The lens is made of optical-quality, tempered glass. As with all glass, avoid dropping or sharp impact on spotlight.
- Do not allow the hot lens to come in contact with water or materials subject to heat damage.
- This spotlight is weather resistant. It is not waterproof. Do not use the spotlight under water or store outdoors for extended periods.
- Only use a Brinkmann 12-volt, halogen bulb that is designed for your Q-Beam spotlight. Use of any other bulb may result in poor performance and may damage your spotlight.
- After months of use, cigarette lighters can build up corrosion that may prevent your Q-Beam spotlight from making good contact. It may be necessary to clean the inside of your cigarette lighter receptacle with a fine emery cloth. Before cleaning receptacle, remove the fuse to prevent it from shorting out.
