GTDN500GM

GE® 7.0 cu. ft. stainless steel capacity gas dryer with Sensor Dry™

Dimensions and Installation Information (in inches)

Exhaust Option: When viewed from the front of the unit, exhaust 3-way via rear, left and bottom. Dryer is shipped exhausted to the rear. Alternate exhausting knockouts are supplied.

Gas: An individual, properly-grounded branch circuit, with a three-prong grounding-type receptacle, protected by a 15 or 20 amp circuit breaker or a time-delay fuse is required.

Gas Dryer Electric Rating: 120V, 60Hz, 6A

Gas (BTU/HR): 22,000. Factory-equipped for natural gas. Tested for LP gas. LP gas supply requires a conversion kit. Check installation instructions for correct kit and have a qualified gas technician install a conversion kit. See dryer ducting information for proper installation.

Note: Dryer wall outlet must be located within 36" of service cord entry and accessible when dryer is mounted in position.

Installation Information: For complete information, see installation instructions packed with your dryer.

For answers to your Monogram,® GE Profile™ or GE® appliance questions, visit our website at ge.com or call GE Answer Center® service, 800.626.2000.

GE® 7.0 cu. ft. stainless steel capacity gas dryer with Sensor Dry™

For complete information, see installation instructions packed with your dryer.

Ducting Materials:
For best performance, this dryer should be vented with 4" diameter all rigid metal exhaust duct. If rigid metal duct cannot be used, then UL-listed flexible metal (semi-rigid) ducting can be used (Kit WX08X10077). In special installations, it may be necessary to connect the dryer to the house vent using a flexible metal (foil-type) duct. A UL-listed flexible metal (foil-type) duct may be used ONLY in installations where rigid metal or flexible metal (semi-rigid) ducting cannot be used AND where a 4" diameter can be maintained throughout the entire length of the transition duct. Please see installation instruction packed with your dryer for complete instructions when using flexible metal (foil type) ducting.

Exhaust Length Calculation:

1. Determine the number of 90° turns needed for your installation. If you exhaust to the side or bottom of dryer, add one turn.
2. The maximum length of 4" rigid (aluminum or galvanized) duct which can be tolerated is shown in the table. A turn of 45° or less may be ignored. Two 45° turns within the duct length should be treated as a 90° elbow. A turn over 45° should be treated as a 90° elbow.

Dryers **must** be exhausted to the outside.

Caution: For personal safety do not terminate exhaust into a chimney, under any enclosed house floor (crawl space), or into an attic, since the accumulated lint could create a fire hazard or moisture could cause damage. Never terminate the exhaust into a common duct or plenum with a kitchen exhaust, since the combination of lint and grease could create a fire hazard.

Exhaust ducts should be terminated in a dampered wall cap to prevent back drafts, bird nesting, etc. The wall cap must also be located at least 12" above the ground or any other obstruction with the opening pointed down.

For more information on venting kits and accessories, please call 1-800-GE-CARES.

Special Installation Requirements

Alcove or Closet Installation:
- If your dryer is approved for installation in an alc
  on the dryer back.
- The dryer MUST be exhausted to the outside.
- Minimum clearances between dryer cabinet a
  0" either side; 3" front and rear
- Minimum vertical space from floor to overhea
- Closet doors must be louvered or otherwise ve
  of 60 sq. in. of open area equally distributed. If
  a dryer, doors must contain a minimum of 120
- No other fuel-burning appliance shall be instal

Bathroom or Bedroom Installation:
- The dryer MUST be exhausted to the outdoors.
- The installation must conform with the local co
  with the National Electric Code and National Fu

Minimum Clearances other than Alcove or Clo
- Minimum clearances to combustible surfaces

GTDN500GM

GE® 7.0 cu. ft. stainless steel capacity gas dryer with Sensor Dry™

Features and Benefits

- Sensor Dry™ - Continually monitors moisture content to help prevent clothing wear and tear
- Rotary electromechanical controls - Easy-to-use controls make it simple to set cycles
- 4 heat selections - Provide the right temperatures for your clothes-drying needs
- Wrinkle Care Extended Tumble - Continues to tumble clothes without heat to help prevent wrinkling and creasing
- Delicates cycle - Low-heat setting helps protect heat-sensitive fabrics, like microfiber and rayon or nylon
- Up to 90 ft. venting capability - Has long equivalent ducting performance for more flexible installation
- Interior dryer light - Convenient interior light helps you easily see clothes
- Model GTDN500GMWS –White on white
