Breezair™
 Global leaders in natural climate control solutions.™

How evaporative cooling works

Evaporation occurs when warm air is drawn into the Breezair EXV, where it's filtered through water-saturated Chillcel™ pads. The air is cooled while the Chillcel™ pads filter out dust, pollen and other contaminants. The result: cool, clean, chemical-free, 100% fresh air that is great for you, your family – and the environment.

Natural Cooling. Natural Savings.

The Breezair EXV Variable Speed Series cooler uses natural evaporation to clean and cool the air. So it's environmentally friendly **and** economical.

While air conditioners can use CFCs, Freon, ammonia or other chemicals to artificially cool the air, all the Breezair EXV uses is water! So it costs up to 80% less to operate than a conventional air conditioner.

In addition, the Breezair EXV circulates fresh air from outside, where air conditioners continue to recirculate the same stale, dry air. That makes the Breezair EXV Variable Speed Series healthier and better for sensitive noses, eyes and skin.

The Breezair EXV Variable Speed Series: The intelligent choice

Breezair™

Keeping cool has never been easier.

The Breezair EXV is a high performance evaporative cooler that provides the kind of performance you need for cooling spacious living areas.

It features an exclusive SensorTouch® Remote Control that allows you to vary and adjust the comfort level, monitor your cooler – and even drain it – from virtually anywhere in your home. In addition, the Breezair EXV comes with a built-in Water Manager and Auto Drain System for easy maintenance. The Breezair Water Manager electronically monitors water quality. Before impurities build-up inside the cooler, they are automatically detected and replaced with clean water. By doing so, cooling efficiency and pad reliability are increased, resulting in decreased maintenance over time.

Harmony SensorTouch® Wall Controller

- Variable speed
- Programmable climate control
- Auto mode, manual mode, timer
- Drain function

Horizon SensorTouch® Remote Control

- Variable speed
- Programmable climate control
- Auto mode, manual mode, timer
- Drain function

Air passes through water-soaked Chillcel™ cooling pads

Water absorbs heat by the natural evaporation process. Cool, fresh air is produced

Exclusive One-piece Aerodynamic Fan

- Double inlet
- Molded one-piece polypropylene centrifugal fan
- Square steel shaft to prevent fan slippage
- Cools more efficiently
- Operates quietly
- Motor lasts longer
- Costs less to operate
- Pre-lubricated and sealed bearings (no oil needed)

The Only Cabinet with a 25-year Warranty!

- Injection molded
- High-strength structural polymer
- UV resistant
- Non-rusting

Seelectric™ Variable Speed Motor

- Automatically adjusts speed to maintain comfort level
- Double-coated with rust inhibitors
- Low energy use
- Heavy duty to last longer
- Low maintenance requirements

Control Power Module

- Advanced electronic controls ensure that the EXV operates at optimum efficiency at all times
- Smart, reliable & durable

Microprocessor

- Constantly analyzes water quality, water consumption and power output

Integrated Diagnostics Module

- Automatically monitors cooler operations and provides self diagnostics

Water Manager and Auto Drain Function

- Monitors water quality by sensing total dissolved solids in cooler sump
- Automatic water draining when cooler is not in use
- Prevents algae growth
- Drain option setting

Long Life Chillcel™ Cooling Pads

- Breezair unique Chillcel™ pads provide maximum cooling
- Honeycomb design with water distribution header block optimizes the cooling effect
- Durable design outlasts competitive products

Non-clogging Water Distribution System

- Unique water flow distributor (patented worldwide by Breezair)
- Fully balanced and continuous water distribution to all Chillcel™ cooling pads
- Maintains perfect pad saturation, maximizing cooling efficiency

Tornado Water Pump

- Impact start
- Fully encapsulated motor windings
- Thermal overload protectors
- Top and bottom ball bearings
- Pumps in 1/2" water

Breezair EXV offers these built-in safety features!

- Circuit breaker
- Thermally-protected variable speed motor and pump
- On-board isolation switch

The variable speed choice for large and small spaces

Unlike air conditioning that requires harsh, earth-unfriendly chemicals to cool the air, Breezair uses only water. That makes the Breezair EXV Variable Speed Series the green alternative – and the environmentally conscious choice.

When cooling a large area – and when conventional air conditioning is simply not an option – evaporative cooling is the smartest move you can make. Whether it is used for space cooling or spot cooling, the Breezair EXV Variable Speed Series cooler is:

- Energy efficient
- Cleaner and healthier
- Easier and less expensive to install
- Environmentally friendly
- Simple to maintain
- Productivity enhancing
