

Product features may vary from the picture above.

# CATERPILLAR® Dump Truck

## Owner's Manual with Assembly Instructions

Please read this manual and save it with your original sales receipt. For Model 78656

Tools needed for assembly: Phillips Screwdriver, Slotted Screwdriver, Hammer, Pliers and Safety Scissors. Use only with a Power Wheels® Type H 6 Volt Battery, Power Wheels® Thermal Fuse and Power Wheels® Type H Super 6<sup>™</sup> Volt Charger (all included).

ELECTRIC TOY: Not recommended for children under 2 years of age. As with all electric products, precautions should be observed during handling and use to prevent electric shock.

### Important Information

- Your new vehicle requires adult assembly. Please set aside at least 45 minutes for assembly.
- You must charge your battery for 18 30 hours BEFORE YOU USE YOUR VEHICLE FOR THE FIRST TIME. We recommend that you start charging your battery before beginning assembly. Please see Battery Charging beginning on page 8 for detailed instructions.
- Read this manual carefully for important safety information and operating instructions before using your vehicle.
- Throughout this manual you will find important messages in the form of WARNINGS, CAUTIONS and NOTES.
   WARNING signals something that could hurt your child or you. CAUTION signals something that can damage the vehicle. NOTE is used to highlight useful information.
- This vehicle is designed for use on grass, asphalt or other hard surfaces by children 2 6 years of age.
- To prevent damaging the motors and gears, do not tow anything behind the vehicle or overload it:
  - Maximum weight of child: 65 lbs.
  - Maximum dump bed weight capacity: 20 lbs.
- When a very lightweight child is driving the vehicle, traction may be reduced on certain types of surfaces. To improve traction, we recommend adding approximately 5 lbs. to the compartment under the seat. Do not add weight under the dump bed, motor cover, front cab or any other place on the vehicle. Add weight only under the seat. As your child grows, the extra weight can be decreased or eliminated.

- The dump bed has been designed to automatically dump any load which exceeds 20 lbs. in the center of the dump bed. Do not modify the dump bed to defeat this safety feature.
- If you have any questions about your Power Wheels<sup>®</sup> vehicle, please call our toll-free service lines at

   1-800-348-0751 from 8 AM to 6 PM (EST) Monday through Friday. Trained customer service representatives are available to take your call in English or French. Habla Español? Si usted tiene alguna pregunta ó necesita asistencia llame gratis 1-800-348-0755 para los Estados Unidos. Tenemos representantes que hablan español para atender su llamada.
- For your convenience, Power Wheels maintains an Authorized Service Center Network with more than 300 authorized service centers nationwide. Our authorized service centers will repair or replace parts under warranty at no extra charge, and can perform non-warranty repairs for a minimal charge. Please see the Authorized Service Center list beginning on page 28 to find the authorized service center nearest to you, or call **1-800-348-0751**.
- Please complete and return the enclosed Registration Card today, or call **1-800-348-0751** to register your vehicle by phone.

## 

• Use the charger indoors only.

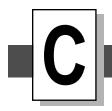

### Warnings

## WARNING

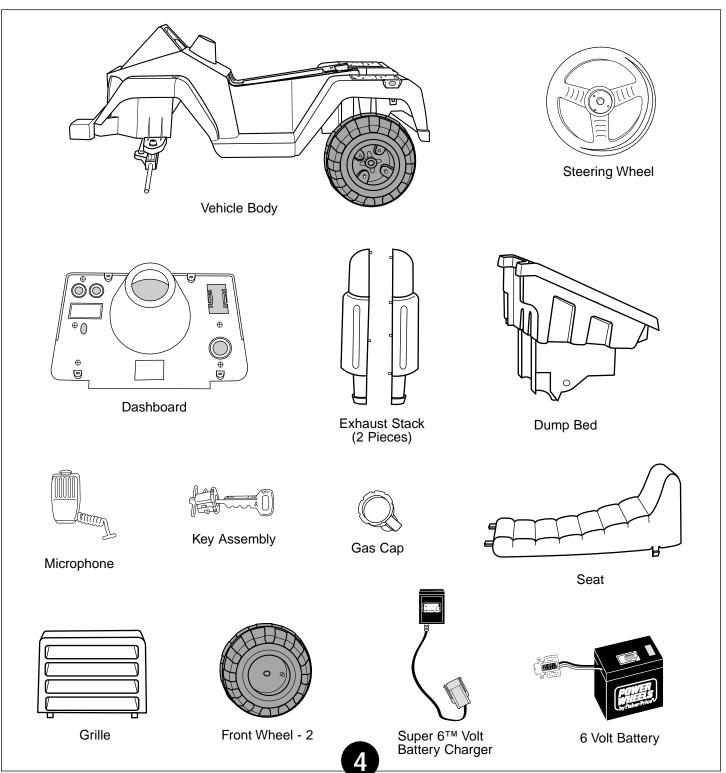

- Children can be harmed by small parts, sharp edges and sharp points in the vehicle's unassembled state, or by electrical items. Care should be taken in unpacking and assembly of the vehicle. Children should not handle parts, including the battery, or help in assembly of the vehicle.
- Keep small parts and plastic bags out of children's reach. Dispose of plastic bags properly.
- Adult supervision is required. Children do not have the judgement necessary to avoid many accidents. Be sure that children operating this vehicle can do so safely and that they are supervised at all times.
- Never use near steps, driveways, steep inclines, roadways, alleys, swimming pool areas or other bodies of water.
- Always wear shoes or sneakers when operating this vehicle.
- Never allow more than one rider.
- The rider should sit on the seat when the vehicle is in operation.
- Do not allow children to sit in the dump bed.
- The battery and the vehicle hood provide weight needed for vehicle stability. **DO NOT** move the battery to another location. Refasten the hood before operating the vehicle.
- Hot motor cover. Handle carefully.
- Never alter this vehicle or its electrical system in any way. Alterations could cause a fire resulting in injury and could also ruin the electrical system.
- Use of the wrong type battery, fuse or charger could cause a fire or explosion, resulting in serious injury.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in injury. Lift and carry the battery by the case only.
- Read the cautions on the back panel of the battery.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the vehicle until you have replaced the worn or damaged part as it could possibly cause a fire resulting in injury.

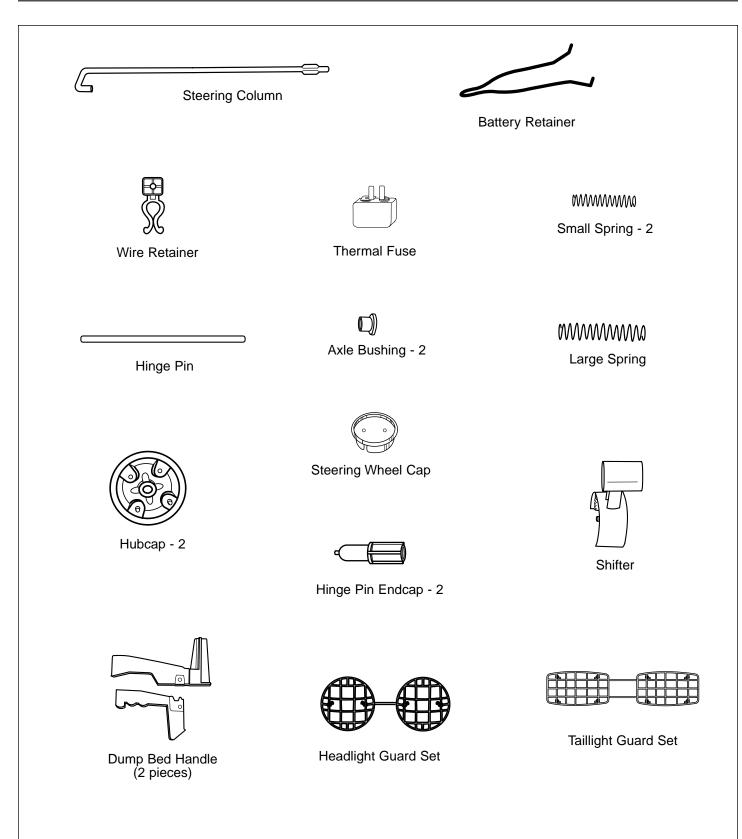

### Parts

- If you experience a problem with this product, or are missing a part, please call us at **1-800-348-0751**, rather than return this product to the store.
- Please identify all parts before assembly and save all packaging material until assembly is complete to ensure that no parts are discarded.
- Metal parts have been coated with a lubricant to protect them during shipment. Wipe all metal parts with a paper towel to remove any excess lubricant.

### **Battery Charging**

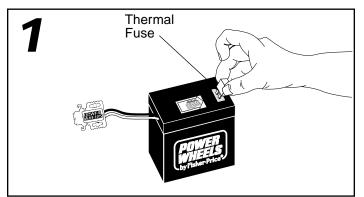

## 

- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Use of the wrong type battery, fuse or charger could cause a fire or explosion, resulting in serious injury.
- Read the cautions on the back panel of the battery.
- Never lift or carry the battery by the wires or connectors. This can damage the battery and possibly cause a fire. Lift and carry the battery by the case only.
- Examine the battery, charger and their connector for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the vehicle until you have replaced the worn or damaged part.
- Never alter this vehicle or its electrical system in any way. Alterations could cause a fire resulting in injury and could also ruin the electrical system.

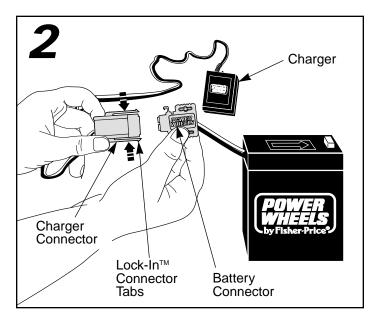

### **Battery Charging**

- Your new battery must be charged for at least 18 hours before you use it in your vehicle for the first time.
- We recommend that you start charging your battery before beginning assembly of your new vehicle.
- The battery must be upright while charging.
- Do not short circuit the battery.
- You do not need to remove the battery from your vehicle to recharge it.
- Use only a Power Wheels<sup>®</sup> Type H Super 6<sup>™</sup> volt charger (120 VAC 60 Hz 30W with an output of 6 VDC 7.2W (1200mA) to charge your Power Wheels<sup>®</sup> 6 volt battery.

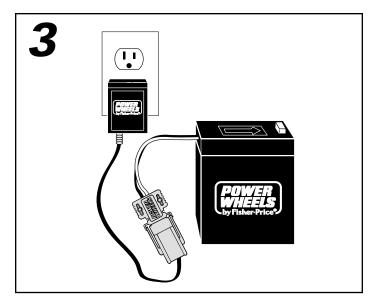

- If you are charging the battery for the first time, insert a thermal fuse into the battery.
- If you are recharging your battery, make sure the thermal fuse already installed in the battery is in good condition. Remove the fuse from the battery and shake it gently. If it rattles, it has blown. Replace a blown fuse with a new Power Wheels® thermal fuse.

• Squeeze the Lock-In<sup>™</sup> connector tabs on the charger connector and plug it into the battery connector.

**IMPORTANT NOTE!** If you are recharging your battery, you will first need to disconnect the battery connector from the motor harness connector under the hood of your vehicle.

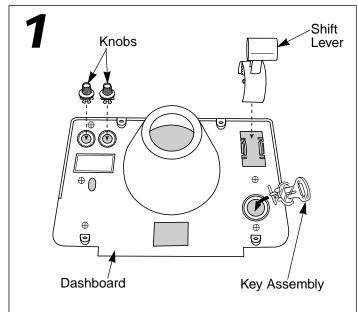

- Plug the charger into a standard 120 volt wall outlet. **Note:** If power flow to the wall outlet is controlled by a switch, make sure the switch is "ON".
- Before first time use, charge the battery for **at least 18** hours. Never charge the battery longer than 30 hours.
- Note: The battery must be upright while charging.
- Recharge the battery after each use of your vehicle for at least 14 hours. Do not charge the battery longer than 30 hours.
- Once the battery is charged, disconnect the charger connector from the battery connector. The battery is now ready to be installed in your vehicle. Please see the Battery Installation section on page 18 for detailed instructions on installing your battery. If your battery is already installed in your vehicle, simply re-connect the battery connector and motor harness connector and lower the hood of the vehicle. Always remember to lock the hood with the lock fasteners to prevent children from accessing the battery.

## 

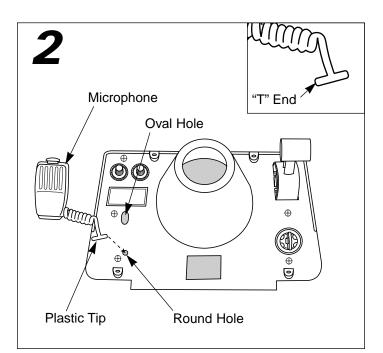

• Use the charger indoors only.

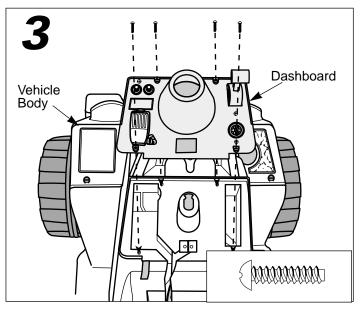

### Do Not Omit Any Steps

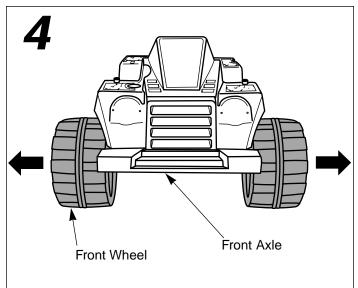

• Snap the shift lever, key assembly and knobs into the dashboard, as shown.

- Insert the end of the microphone cord through the small round hole in the dashboard.
- Bend the the plastic tip at the end of the microphone cord so that it forms a "T" behind the dashboard.
- Pull gently on the microphone cord to make sure it is secure in the dashboard.
- Fit the tab on the back of the microphone into the oval hole in the dashboard to hang it on the dash.

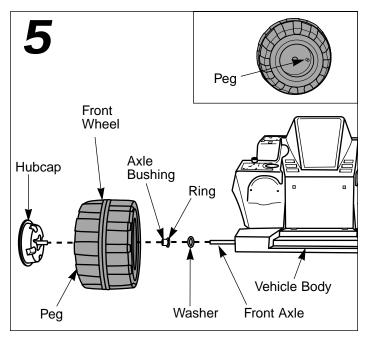

- Fit the dashboard on the vehicle body.
- Insert four #8 x <sup>3</sup>/<sub>4</sub>" screws through the holes in the dashboard and into the vehicle body.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

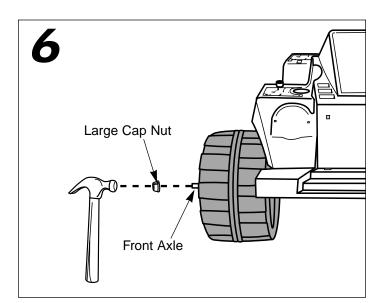

• Slide the front wheels off the front axles.

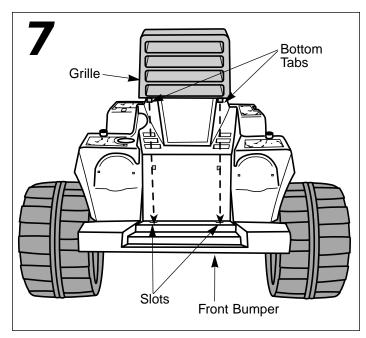

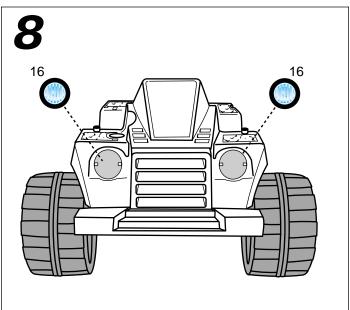

- Slide a 7/16" washer onto one of the front axles.
- Slide an axle bushing onto the front axle. Make sure the axle bushing is positioned as shown in the illustration, with the ring facing the washer.
- Slide a front wheel onto the front axle. Make sure that the peg on the wheel is facing away from the axle bushing.
- Slide a hubcap onto the front axle.
- Rotate the hubcap to make sure it is fully seated inside the center of the wheel.

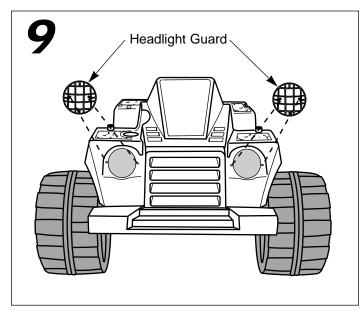

- Fit a large cap nut on the end of the front axle.
- Tap the cap nut gently with a hammer to secure it on the end of the axle.
- Pull on the wheel to make sure the cap nut is firmly attached to the front axle.
- Repeat assembly steps 5 and 6 to assemble the other front wheel.

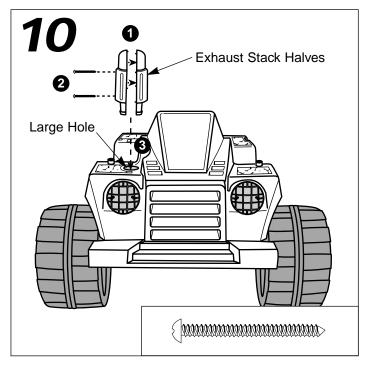

- Face the front of the vehicle.
- Fit the tabs extending from the bottom of the grille into the rectangular slots above the front bumper.
- Push on the grille to snap the tabs on the back of the grille into the slots in the front of the vehicle body.

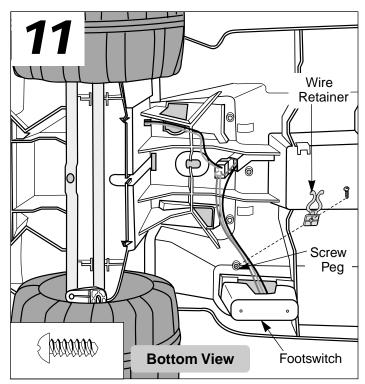

- Align the slots in the headlight labels with the headlight guard slots in the hood. Apply the headlight labels as shown.
- Make sure the areas where the labels will be applied are clean and dry. For best adhesion, avoid repositioning the labels once they are applied to the vehicle.

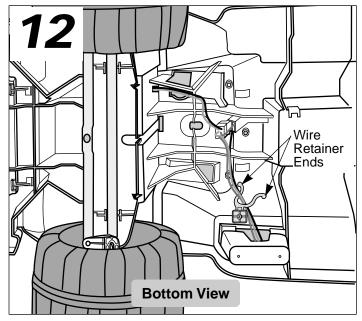

- Using safety scissors, separate the round headlight guards from the plastic connector. Dispose of the plastic connector.
- Fit the tabs on the back of the headlight guards into the slots in the front of the hood.
- Push firmly to snap the tabs into the hood.

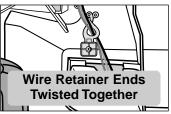

- Fit together the two halves of the exhaust stack  $\mathbf{0}$ .
- Insert two #6 x  $1^{1/2}$ " screws into the exhaust stack 2 .
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.
- Fit the end of the exhaust stack into the large hole in the top of the vehicle body and push firmly until it snaps into the vehicle body 3.

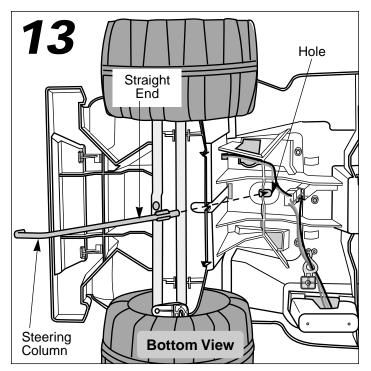

- Turn the vehicle body on its side.
- Align the hole in the wire retainer with the screw peg in the underside of the vehicle body, near the footswitch.
- Insert a #8 x 1/2" screw through the wire retainer and into the vehicle body.
- Tighten the screw with a Phillips screwdriver. Do not over-tighten.

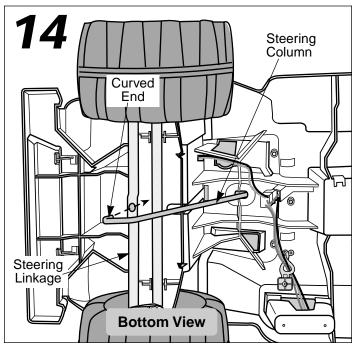

- Place the wiring between the ends of the wire retainer.
- Twist the ends of the wire retainer together to hold the wiring against the vehicle body.

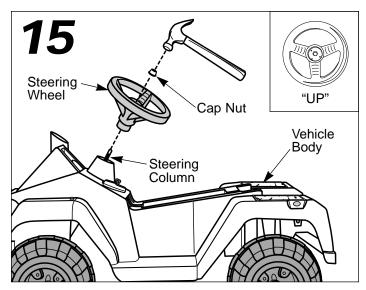

- Wipe the steering column with a paper towel to remove any excess lubricant.
- Slide the straight end of the steering column up through the hole in the vehicle body and out through the hole in the dashboard.

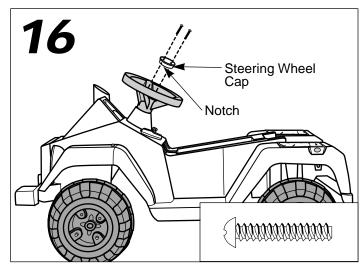

• Fit the curved end of the steering column into the hole in the steering linkage.

- Turn the vehicle body upright.
- Position the steering wheel so that the spokes form a "Y", as shown.
- Fit the steering wheel onto the straight end of the steering column.

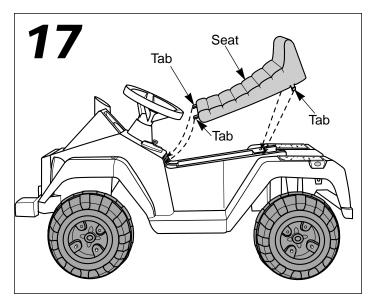

**Helpful Hint:** You may want the help of another adult to support the curved end of the steering column near the steering linkage while assembling the steering wheel to your vehicle.

- Fit a small cap nut onto the straight end of the steering column.
- Tap the cap nut gently with a hammer to secure it.
- Pull up on the steering wheel to make sure the cap nut is firmly attached to the end of the steering column.

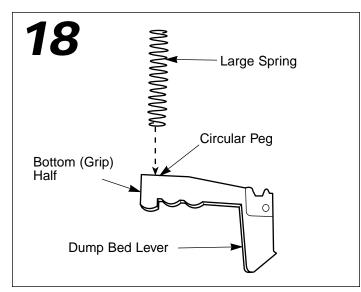

- Align the notch in the steering wheel cap with the tab in the center of the steering wheel and fit the cap onto the steering wheel.
- Insert a #8 x 1" screw into each of the holes in the steering wheel cap.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

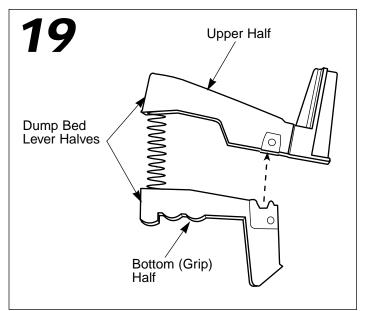

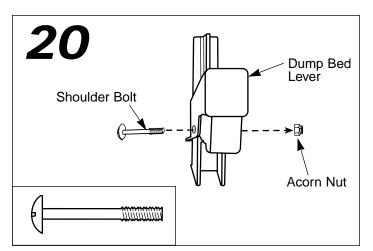

- Fit the tabs on the seat into the holes in the vehicle body.
- Push firmly near each of the tabs to snap them into the vehicle body.

- Separate the two halves of the dump bed lever.
- Fit the large spring onto the circular peg on the inside of the bottom (grip) half of the dump bed lever.

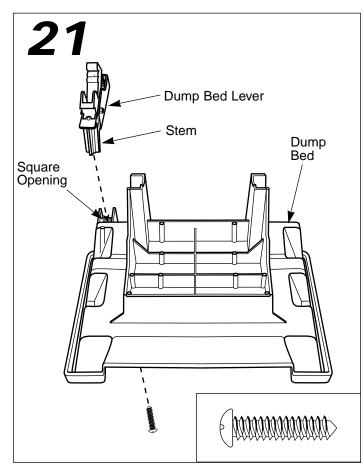

• Re-assemble the two halves of the dump bed lever. Make sure the end of the spring contacts the inside of the circle outlined on the upper half of the dump bed lever.

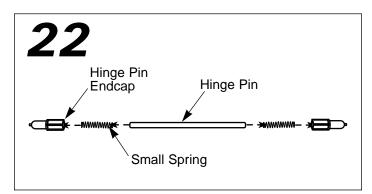

- Align the holes in the upper and lower halves of the dump bed lever and insert a #10 x 1<sup>1</sup>/<sub>4</sub>" shoulder bolt through the dump bed lever, as shown above.
- Fit a #10 32 acorn nut on the end of the shoulder bolt. Do not reverse the position of the shoulder bolt and acorn nut.
- Use pliers to hold the acorn nut steady and tighten the shoulder bolt with a Phillips screwdriver. Do not over-tighten.
- Squeeze the dump bed lever to make sure the bottom half moves freely. If it is too tight, loosen the shoulder bolt and acorn nut slightly.

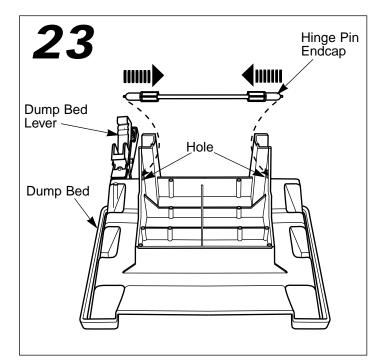

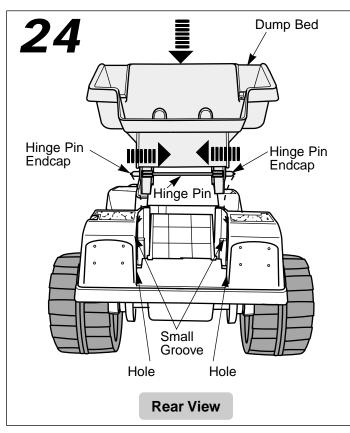

- Position the dump bed upside down.
- Fit the stem on the dump bed lever into the square opening in the bottom of the dump bed.
- Insert a #10 x 1" screw up through the hole in the dump bed and into the dump bed lever.
- •Tighten the screw with a Phillips screwdriver. Do not overtighten.

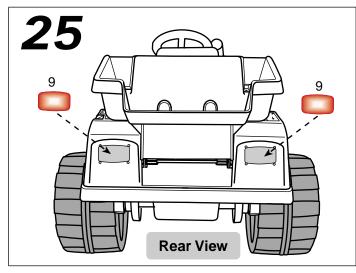

- Insert a small spring into each hinge pin endcap.
- Fit a hinge pin endcap onto each end of the dump bed hinge pin.

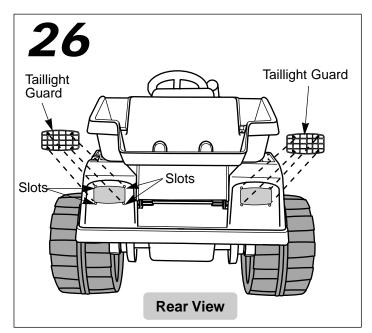

- Push in on the hinge pin endcaps and fit the endcaps through the holes in the underside of the dump bed.
- Release the endcaps to secure the hinge pin in the dump bed.

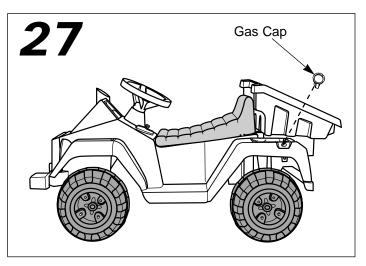

- Face the rear of the vehicle.
- Position the dump bed upright with the hinge pin nearest to you.
- Push in on the hinge pin endcaps and fit the endcaps into the small grooves in the vehicle body.
- Push down on the dump bed to slide the endcaps down the grooves and snap them into the holes in the vehicle body. Make sure the endcaps snap into the holes.

- Apply labels #9 to the taillight areas on the rear of the vehicle body as shown.
- Make sure the areas where the labels will be applied are clean and dry. For best adhesion, avoid repositioning the labels once they are applied to the vehicle.

- Using safety scissors, separate the taillight guards from the plastic connector. Dispose of the plastic connector.
- Fit the tabs on the back of the taillight guards into the slots in the vehicle body.
- Push firmly to snap the tabs into the vehicle body.

• Snap the gas cap into the hole in the side of the vehicle body.

#### One time assembly is now complete.

One extra thermal fuse, one extra small cap nut, and two extra large cap nuts have been included with your vehicle. **Make sure that you do not have any extra washers or axle bushings**. If you have any extra washers and/or axle bushings, you have probably incorrectly assembled the front wheels. To correct the front wheel assembly, use pliers to firmly squeeze the cap nut on the end of each front axle and remove them. Discard the used cap nuts. Reread and repeat assembly steps 4 through 6 to reassemble the front wheels.

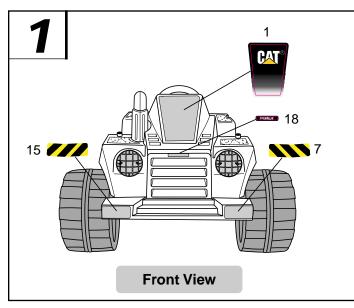

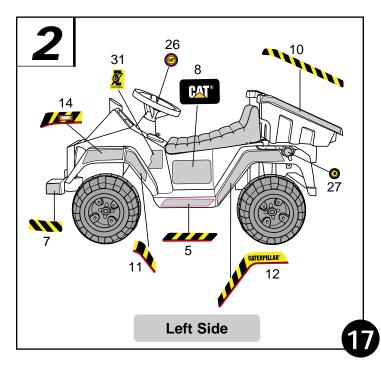

### **Label Decoration**

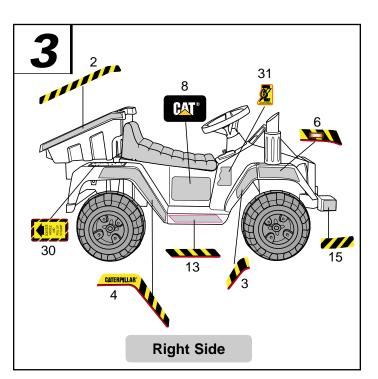

G

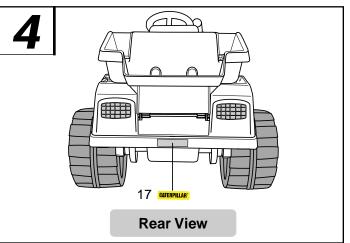

Proper label application will help to keep the labels looking their best! When applying labels, keep the following guidelines in mind:

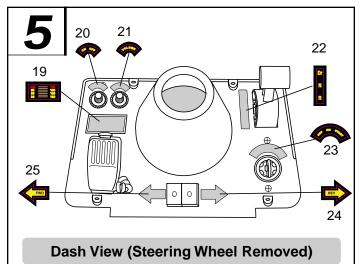

- Wash your hands before applying the labels.
- Before applying the labels, wipe the surface of the vehicle with a clean, dry cloth to remove any dust or oils.
- Place the labels exactly as shown in the illustrations.
- For best results, avoid repositioning a label once it has been applied to the vehicle.
- After applying a label, rub the label firmly with a clean, dry cloth to make sure the label is adhered to your vehicle. Start at the center of a label, and smooth towards the outer edges to remove air bubbles.

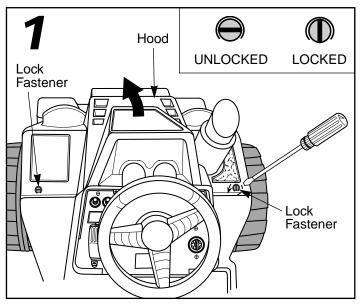

### **Battery Installation**

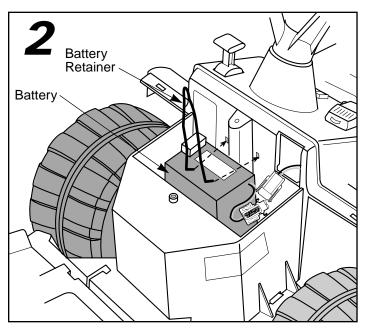

## 🆄 WARNING

The battery and the vehicle hood provide weight needed for vehicle stability. **DO NOT** move the battery to another location. Refasten the hood before operating the vehicle.

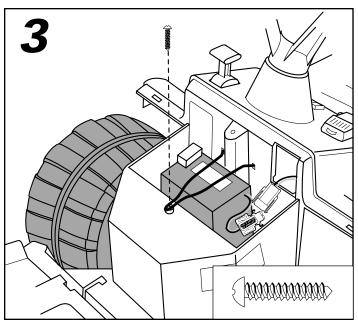

**Important Note:** Use only a Power Wheels<sup>®</sup> Type H battery with a Power Wheels<sup>®</sup> thermal fuse installed. Use of any other battery or fuse will damage your vehicle. Make sure that you charge the battery for at least 18 hours using the enclosed Power Wheels<sup>®</sup> Super 6<sup>™</sup> Volt charger before operating your vehicle for the first time. Charge the battery for at least 14 hours after each use of the vehicle. Never charge the battery longer than 30 hours. Failure to follow these instructions may damage your battery and will void your warranty.

- Using a slotted screwdriver, rotate the lock fasteners <sup>1</sup>/<sub>4</sub>" turn (⊖) to unlock the hood.
- Open the hood.

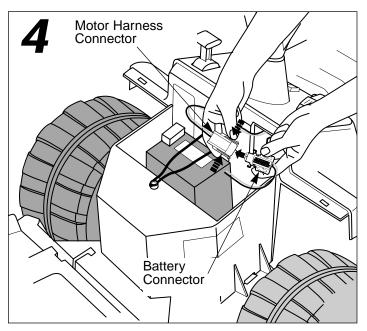

- Place the Power Wheels® Type H battery upright in the battery compartment.
- With the ends of the battery retainer curving up, fit the ends of the battery retainer into the slots in the battery compartment wall.

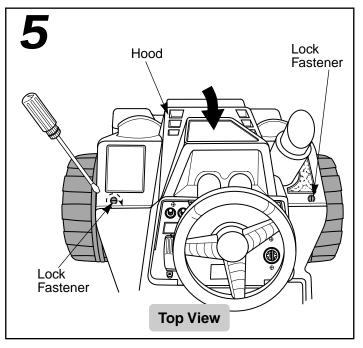

- Lower the battery retainer over the battery, and insert a #8 x <sup>7</sup>/<sub>8</sub>" screw through the bend in the battery retainer and into the vehicle body.
- Tighten the screw with a Phillips screwdriver. Do not over-tighten.

### **Battery Installation**

- Squeeze the tabs on each side of the motor harness connector.
- Plug the battery connector into the motor harness connector.

**Please Note:** If the battery connector will not plug into the motor harness connector, turn it over and try again! Do not force the battery connector into the motor harness connector.

- Lower the hood.
- Rotate the lock fasteners 1/4 turn ( $(\mathbb{O})$ ) to lock the hood and prevent children from accessing the battery.

Battery Care and Disposal

### Care

**If a battery leak develops,** avoid contact with the leaking acid and place the damaged battery in a plastic bag. See information below for proper disposal.

If acid comes in contact with skin or eyes, flush with cool water for at least 15 minutes and call a physician.

**If acid is internally ingested**, give water, milk of magnesia or egg whites immediately. Never give emetics or induce vomiting. Call a physician.

- Charge a new battery for at least 18 hours before first use. Never charge the battery longer than 30 hours. Overcharging or undercharging the battery may shorten battery life and decrease vehicle running time.
- After the first charge, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours. Charge the battery after each use, regardless of how long the vehicle was used.
- The battery must be upright while charging.
- Do not allow the battery to run down completely before charging.
- Charge the battery before storing the vehicle.
- Charge the battery at least once per month, even if the vehicle has not been used.
- Leaving the battery in a discharged condition will ruin it.
- $\bullet$  Do not store the battery in temperatures above 75° F or below -10° F.
- Prevent the battery from moving freely inside the battery compartment. Always use the battery retainer to secure the battery in the battery compartment.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage is detected, do not use the charger or the battery until you have replaced the worn or damaged part.
- Attempting to charge the battery without a thermal fuse or with a blown fuse will not damage the battery, but it will not charge. Check the fuse to make sure it is in good condition each time you charge the battery.

## Disposal

- Your Power Wheels<sup>®</sup> battery is a sealed lead-acid battery. It must be recycled or disposed of in an environmentally sound manner.
- Do not dispose of the lead-acid battery in your regular, household trash. The incineration, landfilling or mixing of sealed lead-acid batteries with household trash is prohibited by law in most areas.
- Return the battery to a federal or state approved leadacid battery recycler, such as a Power Wheels® authorized service center or a local seller of automotive batteries. In Minnesota, call 1-800-348-0751 if further disposal information is required. Contact your local waste management officials for other information regarding the environmentally sound collection, recycling and disposal of lead-acid batteries.

### Rules For Safe Driving

## 

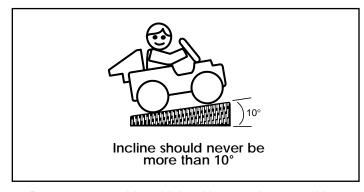

- Adult supervision is required. Children do not have the judgement necessary to avoid many accidents. Be sure that children operating this vehicle can do so safely and that they are supervised at all times.
- Never use near steps, driveways, steep inclines, roadways, alleys, swimming pool areas or other bodies of water.
- Always wear shoes or sneakers when operating this vehicle.
- Never allow more than one rider.
- The rider should sit on the seat when the vehicle is in operation.
- Do not allow children to sit in the dump bed.
- The battery and the vehicle hood provide weight needed for vehicle stability.
   **DO NOT** move the battery to another location. Refasten the hood before operating the vehicle.
- Improper use of this vehicle could lead to a serious or fatal accident. Allow children to play with this vehicle only when you have determined that they can do so safely. Follow all instructions to help your child enjoy this vehicle as safely as possible.

### **Teach Safety Rules to Children**

While children can quickly develop the skill necessary to drive this vehicle, it is important to remember that their judgment skills are still very immature. Unsupervised driving by children can lead to serious injury. Before children use the **CATERPILLAR® Dump Truck**, an adult should carefully evaluate the driving area as well as the children's skill level and ability to drive this vehicle safely. Children are not always able to recognize or anticipate hazards, even when they have been taught about them. There is no acceptable substitute for adult supervision.

Teach appropriate safety rules to your child before allowing operation of this vehicle. These rules should also be reviewed with neighborhood children or other playmates who want to drive or ride in this vehicle.

- 1. Do not allow any child to drive the vehicle in the street or near moving (motorized) vehicles.
- Do not allow any child to drive near bodies of water (such as pools or creeks), obstructions (such as furniture, low tree limbs or play equipment), or drop-offs (such as stairs or decks).
- Do not allow any child to drive the vehicle in the dark. A child could encounter unexpected obstacles and have an accident. Operate the vehicle only in the daytime or in a well-lit area.
- Teach your child to avoid driving on steep inclines or slopes. Restrict your child's driving to areas that are fairly level with gentle inclines or slopes of no more than 10°.
  - While driving down a steep slope, the vehicle may gain unsafe speed, even if the foot pedal is released to stop.
  - While driving across a steep slope, the vehicle may tilt and tip over. The wheels could lose traction, causing the vehicle to slip.
  - While driving up a steep incline, the motor may stop and the vehicle could roll backwards at an unsafe speed.

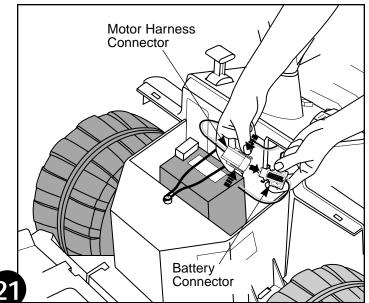

5. Do not operate this vehicle with more than one rider, seated in the seating area. A child who is not sitting on the seat or who is standing on the vehicle could fall off, cause a tip-over or block the driver's view. A child could be seriously injured. Do not allow children or animals to ride in the dump bed.

- 6. Always wear shoes or sneakers when operating this vehicle.
- 7. When a very lightweight child is driving the vehicle, traction may be reduced on certain types of surfaces. To improve traction, we recommend adding approximately 5 lbs. to the compartment under the seat. Do not add weight under the dump bed, motor cover, front cab or any other place on the vehicle. Add weight only under the seat. As your child grows, the extra weight can be decreased or eliminated.
- 8. Never put anything near any moving parts. Rotating parts such as motors, gear boxes and wheels can snag fingers, hair, etc., causing serious injury. Do not allow operation of the vehicle when it is on its side or in an upside-down position.
- 9. Do not operate the vehicle near flammable vapors (gasoline, paint thinner, acetone, liquid wax, etc.). The vehicle's electrical switches, like most electrical switches, emit an internal spark when first turned on or turned off. The presence of flammable liquids or vapors could cause an explosion or a fire. Keep all flammable products in tightly sealed containers and away from the vehicle.
- 10. Do not allow a child to operate the vehicle without proper adult supervision. To prevent unsupervised use of the vehicle, disconnect the motor harness from the battery when the vehicle is not in use.

#### To disconnect the motor harness connector and battery connector:

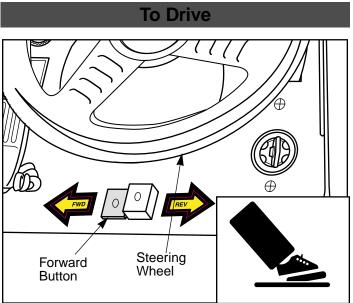

- Using a slotted screwdriver, rotate the lock fasteners <sup>1</sup>/<sub>4</sub> turn (⊕) to unlock the hood.
- Open the hood.
- Squeeze the tabs on the motor harness connector to unplug it from the battery connector.
- Close the hood.

**Important Note:** Always remember to lock the lock fasteners on the hood to prevent children from accessing the battery.

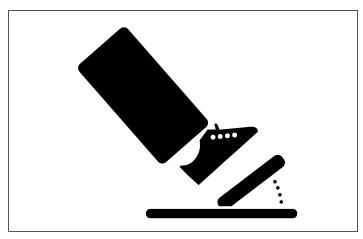

### How to Operate Your Vehicle

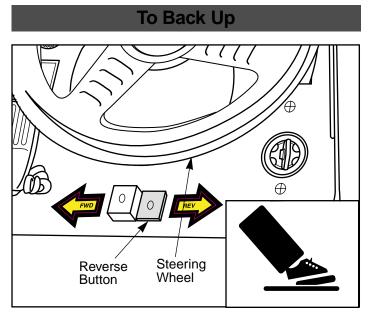

- Push the button on the left side of the FORWARD/REVERSE switch to set the vehicle to drive forward. The FORWARD/REVERSE switch is located on the dashboard directly under the steering wheel.
- Press down on the foot pedal. The vehicle will go forward at a maximum of  $3^{1/2}$  mph.
- Help your child practice steering to learn how far and how quickly to turn the steering wheel when driving forward.

To Stop 🕛

• Your vehicle has a patented, electronic braking system that automatically stops the vehicle when your child's foot is lifted from the pedal.

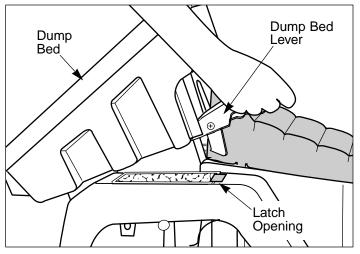

- Push the button on the right side of the FORWARD/REVERSE switch to set the vehicle to drive in reverse. The FORWARD/REVERSE switch is located on the dashboard directly under the steering wheel.
- $\bullet$  Press down on the foot pedal. The vehicle will back up at a maximum of  $3^{1}\!/_{2}$  mph.
- Help your child practice steering to learn how far and how quickly to turn the steering wheel when driving in reverse.

### How to Operate Your Vehicle

#### Using the Dump Bed

- Squeeze the dump lever on the dump bed and pull up on the lever.
- Push down on the dump bed lever to return the dump bed to the upright position.

#### **IMPORTANT NOTES:**

- When using the dump bed, take care to keep fingers away from the dump lever latch opening.
- Keep children and animals out of the dump bed.
- Do not overload the dump bed by loading more than 20 lbs. in the dump bed. Remember that the dump bed will automatically dump any load over 20 lbs. Do not defeat the auto-dump feature.
- Do not lean over the dump bed while it is in operation.
- Make sure there is no one standing behind the dump bed when loading or unloading.
- Keep fingers and other body parts out from under the dump bed area and away from the area between the dump bed and the seat.

- Check all nuts, bolts, and their protective coverings regularly and tighten as required. Check plastic parts on a regular basis for cracks or broken pieces.
- During snowy or rainy weather, the vehicle should be stored inside or under a protective cover. Remember to charge the battery at least once per month while your vehicle is not in regular use.
- Avoid operating the vehicle in wet or snowy conditions, and do not spray the vehicle with a hose. Do not wash the vehicle with soap and water. Water or moisture in the motors or electrical switches can cause them to corrode, and could cause switch or motor failure.
- Avoid operating the vehicle on sand, loose dirt or gravel. Sand, loose dirt or gravel in the motors or electrical switches can cause them to jam, and could cause switch or motor failure.
- The vehicle can be wiped down with a soft, dry cloth. For a shiny finish, you can wipe plastic parts with a non-wax furniture polish applied to a soft-cloth. Do not use automotive wax. Do not use soap and water or spray the vehicle with a hose.
- Regular cleaning under the dump bed will prevent excessive dirt from coming into contact with the motor and gearbox. Remove the dump bed from the vehicle and clean the area by vacuuming or by wiping the area with a soft, dry cloth. Do not spray the vehicle with water. To remove the dump bed:
- Place the dump bed in the unloading position.
- Squeeze the hinge pin endcaps toward the center of the dump bed.
- Lift the dump bed to remove it.
- To ensure that your vehicle stays in good operating order, we recommend that you periodically have your vehicle checked by a Power Wheels® authorized service center. See page 28 for the list of authorized service centers or call **1-800-348-0751** for the location of the authorized service center nearest you.

**IMPORTANT!** If you experience a problem with your vehicle, first check the Problems and Solutions Guide below. If you still experience a problem, please contact Power Wheels® Consumer Affairs, toll-free at 1-800-348-0751 between 8 AM and 6 PM (EST) Monday through Friday. Or, contact your local Power Wheels® authorized service center. For the location nearest you, please refer to the Authorized Service Center list beginning on page 28.

Problem	Possible Cause	Solution
Vehicle does not run Undercharged ba	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Charger is not working	There is no sure way to tell if your charger is working unless you have a volt meter. If you suspect there is a problem with your charger, contact your local Power Wheels® authorized service center. They can test your charger for you.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® thermal fuse before charging. For best performance, do not use substitute parts.
	Blown fuse	Make sure that the fuse in the battery is in good condition. Remove the fuse from the battery and shake it gently. If it rattles, it has blown. Replace a blown fuse with a Power Wheels® thermal fuse. For best performance, do not use substitute parts.
	Loose wire or loose connectors	Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector, and that there are no loose wires around the motors.
	Dead battery	If your battery is old or if you have not followed Battery Care instructions, your battery may be dead. If you are unsure whether or not the battery is dead, you can have it tested at your local Power Wheels® authorized service center.
	Electrical switch damage	The electrical switches can become corroded due to exposure to water or moisture, or can jam due to loose dirt, sand or gravel. Contact your local Power Wheels® authorized service center for diagnosis and repair.
	Motor damage	Contact you local Power Wheels® authorized service center for diagnosis and repair.

Problem	Possible Cause	Solution
Vehicle was running but suddenly stopped	Loose wire or loose connectors	Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector, and that there are no loose wires around the motors.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® thermal fuse installed before charging. For best performance, do not use substitute parts.
	Blown fuse	Make sure that the fuse in the battery is in good condition. Remove the fuse from the battery and shake it gently. If it rattles, it has blown. Replace a blown fuse with a Power Wheels <sup>®</sup> thermal fuse. For best performance, do not use substitute parts.
	Vehicle is overloaded	Make sure you do not overload the vehicle by allowing more than 1 rider at one time, by exceeding the 65 lbs. maximum weight capacity, or by towing objects behind the vehicle. If the vehicle is overloaded, it will automatically shut down. The vehicle will reset itself after approximately 20 seconds. Reduce the load on the vehicle to prevent additional automatic shut-downs.
	Driving conditions are too stressful	Use only on gentle inclines or slopes of 10° or less. Extreme temperatures can also affect run time. If the driving conditions are too stressful, the vehicle will automatically shut down. The vehicle will reset itself after approximately 20 seconds. Adjust the driving conditions to prevent additional automatic shut-downs.
Short run time (Less than 1 - 3 hours per charge)	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all wires and connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Overcharged battery	Do not charge the battery longer than 30 hours. If you suspect that your battery is damaged as a result of overcharging, contact your local Power Wheels® authorized service center. They can test your battery for you.
	Battery is old and will not accept full charge	Even with proper care, a rechargeable battery does not last forever. Average battery life is 1 to 3 years depending on vehicle use and use conditions. For best performance, do not use substitute parts.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® thermal fuse before charging. For best performance, do not use substitute parts.
	Driving conditions are too stressful	Use only on gentle inclines or slopes of 10° or less. Extreme temperatures can also affect run time. If the driving conditions are too stressful, the vehicle will automatically shut down. The vehicle will reset itself after approximately 20 seconds. Adjust the driving conditions to prevent additional automatic shut-downs.

Problem	Possible Cause	Solution
Vehicle runs sluggishly	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Battery needs charging	After approximately 3 hours of constant use, the battery needs charging.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® thermal fuse installed before charging. For best performance, do not use substitute parts.
	Battery is old and will not accept full charge	Even with proper care, rechargeable batteries do not last forever. Average battery life is 1 to 3 years depending on the vehicle use and use conditions. Replace the battery with a Power Wheels® Type H 6 volt battery. For best perfor- mance, do not use substitute parts.
	Vehicle is overloaded	Make sure you do not overload the vehicle by allowing more than 1 rider at one time, exceeding the 65 lbs. maximum weight capacity, or by towing objects behind the vehicle. If the vehicle is overloaded, it will automatically shut down. The vehicle will reset itself after approximately 20 seconds. Reduce the load on the vehicle to prevent additional automatic shut-downs.
	Driving conditions are too stressful	Use only on gentle inclines or slopes of 10° or less. Extreme temperatures can also affect run time. If the driving conditions are too stressful, the vehicle will automatically shut down. The vehicle will reset itself after approximately 20 seconds. Adjust the driving conditions to prevent additional automatic shut-downs.
Sometimes the vehicle doesn't run, but other times it does	Loose wire or connector	Check all wires around the motors and all connectors to make sure they are tight.
	Motor or electrical switch damage	Contact your local Power Wheels® authorized service center for diagnosis and repair.
When the foot pedal is pressed, the vehicle won't run without	Loose wire or connector	Check all wires around the motors and all connectors to make sure they are tight.
a push	"Dead Spot" on motor	Contact your local Power Wheels® authorized service center for diagnosis and repair.

Problem	Possible Cause	Solution
Vehicle constantly blows fuses	Wrong type of fuse used	Your vehicle requires a Power Wheels® thermal fuse in the battery. Make sure the Power Wheels® thermal fuse is properly installed in the battery. For best performance, do not use substitute parts.
	Child is switching between FORWARD and REVERSE without stopping.	Teach your child to stop the vehicle before switching between FORWARD and REVERSE.
Loud clacking or grinding noise from a motor-gearbox	Broken gears	Contact your local Power Wheels® authorized service center for diagnosis and repair.
Charger gets warm during use	It is normal for some chargers to get warm during use and is not reason for concern. Some chargers do not get warm during use.	No action required.
		If your charger does not get warm during use, it does not mean that it is not working properly.
Battery makes a sizzling or	It is normal for some batteries to make noise and swell slightly while charging and is not reason for concern. Some batteries do not make noise or swell while charging.	No action required.
gurgling noise when charging		If your battery does not make noise or swell slightly during charging, it does not mean that it is not accepting the charge.

If, after reviewing the Problems and Solutions Guide, the vehicle still fails to operate, please contact your nearest authorized service center (see page 28) or contact Power Wheels<sup>®</sup> Consumer Affairs toll-free at **1-800-348-0751**. **Helpful Hint**: For faster service when calling Consumer Affairs, completely charge the battery before calling and have the following available by the phone:

- vehicle,
- · vehicle model number (see sticker in battery compartment),
- vehicle production run number (see sticker in battery compartment),
- Phillips screwdriver, slotted screwdriver and needle-nose pliers with plastic or rubber handles,
- an extra Power Wheels® thermal fuse is helpful.

#### 90-day limited warranty for the Power Wheels® Ride-On Toy Vehicle

#### A 6-month battery warranty applying only to the 6 volt battery which was included by Power Wheels®, with the Power Wheels® vehicle when originally purchased.

This limited warranty covers the Power Wheels® ride-on vehicle and the 6 volt battery, purchased from Power Wheels® by the original purchaser, against defects in materials and workmanship.

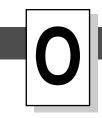

This warranty covers normal use and does not cover the Power Wheels<sup>®</sup> vehicle or battery if damaged by unreasonable use, neglect, accident, abuse, misuse, improper service or other causes not arising out of defects in materials or workmanship. Evidence of any attempt at consumer repair will void this warranty. This warranty does not cover, and is intended to exclude, any liability on the part of Power Wheels®, whether

under this warranty or implied by law or any indirect or consequential damages for breach of warranty Some states do not allow the exclusion or limitation so this limitation may not apply to you.

Should you need service or assistance with your vehicle during the warranty period, DO NOT RETURN THE VEHICLE TO THE STORE. Power Wheels® has provided a nationwide network of authorized service centers. Please refer to the list in this manual. Power Wheels® is continually expanding our Authorized Service Center Network. If there is not an authorized service center in your area, please call Consumer Affairs for information, 1-800-348-0751.

This warranty gives you specific legal rights, and you may also have other rights which may vary from state to state.

PLEASE SAVE YOUR ORIGINAL SALES RECEIPT.

### **Authorized Service Centers**

We are continually expanding our Authorized Service Center Network. Please check this listing for the authorized service center nearest you. If there is not one in your area, please call Power Wheels® Consumer Affairs at 1-800-348-0751.
