FREQUENTLY ASKED QUESTIONS

Q: My grates have rust on them. How do I get rid of it?
If rust occurs, clean with a steel brush. Reapply vegetable shortening and heat as indicated above.

Q: The paint finish inside my lid is peeling. What can I do?
You are seeing a deposit of grease and smoke that collects during normal use that resembles paint. These carbon deposits are non-toxic, but you may want to regularly remove the build-up. Remove buildup using a brass or stiff bristle brush before grilling. Future build-up can be avoided by simply wiping the grill lid while slightly warm with a mild soap-and-water solution.

Q: When can I put my meat on the grill?
Grill is ready for use when charcoal is ashed over and no visible flames are present.

Q: How do I regulate the heat on my grill?
Adjusting the dampers will increase and decrease airflow and heating.

SAFE STORAGE AND MAINTENANCE

- Inspect hardware tightness on a regular basis to insure grill is in safe working condition.

- ALWAYS cover and store cold grill in a protected area.
- Indoor storage of grill is permissible only if the charcoal has burned to a complete ash AND is cold. Remember to remove cold ashes before storing.
- Grill is made of steel and may rust over time. If rusting occurs on outside surfaces, clean area with sand paper or steel wool, then cover with heat resistant paint.
- If rusting occurs on the inside surface of grill, clean area with sandpaper or steel wool, then coat with cooking oil.
- NEVER USE PAINT ON INSIDE SURFACES OF GRILL
