The use and installation must conform with local codes or, in the absence of local codes, with either the *National Fuel Gas Code, ANSI Z223.1/NFPA 54, Natural Gas and Propane Installation Code, CSA B149.1, or Propane Storage and Handling Code, B149.2, or the Standard for Recreational Vehicles, ANSI A 119.2/ NFPA 1192, and CSA Z240 RV Series, Recreational Vehicle Code, as applicable.*

THIS INSTRUCTION BOOKLET CONTAINS IMPORTANT SAFETY INFORMATION. PLEASE READ AND KEEP FOR FUTURE REFERENCE.

If you are assembling this unit for someone else, give this manual to them to read and save for future reference.

California Proposition 65: Combustion by-products produced when using this product contain chemicals known to the State of California to cause cancer, birth defects, and other reproductive harm.

California Proposition 65: Wash your hands after handling this product.

California Proposition 65: Handling the brass material on this product exposes you to lead, a chemical known to the State of California to cause cancer, birth defects, or other reproductive harm.

If you have questions or need assistance during assembly, please call 1-800-694-0013

WARNING

FOR YOUR SAFETY:

1. Improper installation, adjustment, alteration, service or maintenance can cause injury or property damage.
2. Read the installation, operation, and maintenance instructions thoroughly before installing or servicing this equipment.
3. Failure to follow these instructions could result in fire or explosion, which could cause property damage, personal injury, or death.
4. This instruction manual contains Important information necessary for the proper assembly and safe use of the appliance.
5. Read and follow all warnings and instructions before assembling and using the appliance.
6. Follow all warnings and instructions when using the appliance.
7. Keep this manual for future reference.

WARNING

FOR YOUR SAFETY:

1. Do NOT store or use gasoline or other flammable liquids or vapors in the vicinity of this or any other appliance.
2. An LP cylinder not connected for use shall NOT be stored in the vicinity of this or any other appliance.

DANGER

Never operate this appliance unattended.

DANGER

If you smell gas -

1. Shut off gas to appliance.
2. Extinguish any open flame.
3. Open lid.
4. If odor continues, keep away from the appliance and immediately call your gas supplier or your fire department.

WARNING

FOR YOUR SAFETY:

For Outdoor Use Only
(outside any enclosure)

Manufactured in China for: RevoAce Inc. Limited
Hong Kong, China

Important Safeguards Warning

- ▲ This grill is for outdoor use only, and should not be used in a building, garage or any other enclosed area.
- ▲ Do NOT operate, light or use this appliance within ten feet (3.05 m) of walls, structures or buildings.
- ▲ For residential use only. This grill is NOT for commercial use.
- ▲ This grill is NOT intended for and should never be used as a heater. TOXIC fumes can accumulate and cause asphyxiation.
- ▲ This grill is safety certified for use in the United States and/or Canada only. Do NOT modify for use in any other location. Modification will result in a safety hazard and will void your warranty.
- ▲ Do NOT use grill for indoor cooking. TOXIC carbon monoxide fumes can accumulate and cause asphyxiation.
- ▲ **Propane:** The “gas” side of the grill, from the factory, is for use with liquid propane (LP) gas only. The conversion to or attempted use of natural gas in this LP gas grill is dangerous, may cause bodily harm and will void your warranty.
- ▲ **Charcoal:** Never use charcoal that has been pre-treated with lighter fluid. Use only a high grade plain charcoal, charcoal/wood mixture, lump charcoal or cooking wood. The conversion to or attempted use of any other fuel source in this charcoal grill is dangerous and will void your warranty.
- ▲ **Propane:** Never use charcoal, lighter fluid, lava rocks, gasoline, kerosene or alcohol in the “gas” side of the grill.
- ▲ LP gas characteristics:
 - a. LP gas is flammable and hazardous if handled improperly. Become aware of the characteristics before using any LP gas product.
 - b. LP gas is explosive under pressure, heavier than air, and settles/pools in low areas.
 - c. LP gas in its natural state has no odor. For your safety, an odorant is added that smells like rotten cabbage.
 - d. Contact with LP gas can cause freeze burns to skin.
- ▲ Apartment dwellers: Check with management to learn the requirements and fire codes for using a LP gas grill in your apartment complex. If allowed, use outside on the ground floor with a ten foot (3.05 m) clearance from any structure. Do NOT use on or under balconies.
- ▲ LP gas cylinder needed to operate. Only cylinders marked “propane” may be used.
- ▲ The LP gas cylinder must be constructed and marked in accordance with the *Specifications for LP-gas Cylinders* of the U.S. Department of Transportation (D.O.T.) or the National Standard of Canada, *CAN/CSA-B339, Cylinders, Spheres and Tubes for the Transportation of Dangerous Goods; and Commission*.
- ▲ LP gas cylinder must be arranged for vapor withdrawal.
- ▲ The LP gas cylinder must have a listed overfilling prevention device (OPD).
- ▲ Only use LP gas cylinders equipped with a cylinder connection device compatible with the connection for outdoor cooking appliances.
- ▲ The LP gas cylinder must have a cylinder collar to protect the cylinder valve.
- ▲ Never use a LP gas cylinder with a damaged body, valve, collar or footing.
- ▲ Dented or rusted LP gas cylinders may be hazardous and should be checked by your LP gas supplier prior to use.
- ▲ The LP gas cylinder should not be dropped or handled roughly.
- ▲ LP gas cylinders must be stored outdoors out of the reach of children and must not be stored in a building, garage or any other enclosed area. Your cylinder must never be stored where temperatures can reach over 125°F.
- ▲ Do NOT insert any tool or foreign object into the valve outlet or safety relief valve. You may damage the valve and cause a leak. Leaking propane may result in an explosion, fire, severe personal injury or death.
- ▲ Do NOT block holes in sides or back of grill.
- ▲ Never keep an LP gas cylinder in a hot car or trunk. Heat will cause the gas pressure to increase, which may open the relief valve and allow gas to escape.
- ▲ Place dust cap on cylinder valve outlet whenever the cylinder is not in use. Only install the type of dust cap on the cylinder valve outlet that is provided with the cylinder valve. Other types of caps or plugs may result in leakage of propane.
- ▲ If grill is not in use, the gas must be turned off at the supply cylinder and disconnected.
- ▲ Do NOT store a spare LP gas cylinder under or near this appliance.
- ▲ Never fill the cylinder beyond 80 percent full.
- ▲ A fire causing serious injury or damage to property may occur if the above is not followed exactly.
- ▲ Never attempt to attach this grill to the self-contained LP gas system of a camper trailer, motor home or house.
- ▲ Your grill has been checked at all factory connections for leaks. Recheck all connections as described in the “Operating Instructions” section, as shipping can loosen connections.
- ▲ Check for leaks even if your unit was assembled for you by someone else.
- ▲ Do NOT operate if a gas leak is present. Gas leaks may cause a fire or explosion.
- ▲ You must follow all instructions in “Checking for Leaks” section before operating. To prevent fire or explosion hazard when testing for a leak:
 - a. Always perform a leak test before lighting the grill and each time the cylinder is connected for use.
 - b. No smoking. Do NOT use or permit sources of ignition in the area while conducting a leak test.
 - c. Conduct the leak test outdoors in a well-ventilated area.
 - d. Do NOT use matches, lighters, or a flame to check for leaks.
 - e. The use of alcohol, prescription or non-prescription drugs may impair the consumer’s ability to properly assemble or safely operate the appliance.
 - f. Strong odors, colds, sinus congestion, etc. may prevent the detection of propane. Use caution and common sense when testing for leaks.
 - g. Do NOT use grill until any and all leaks are corrected. If you are unable to stop a leak, disconnect the LP gas supply. Call a gas appliance serviceman or your local LP gas supplier.
- ▲ This grill is designed to operate at an inlet pressure of: 11 inches water column.
- ▲ Do NOT store or use gasoline or other flammable liquids or vapors within 25 feet (7.62 m) of this appliance.
- ▲ Do NOT use in an explosive atmosphere. Keep grill area clear and free from combustible materials, gasoline and other flammable vapors and liquids.
- ▲ Minimum clearance from sides and back of unit to combustible construction is 36 inches (91.4 cm). Do NOT use this appliance under any type of overhang or roof.
- ▲ It is essential to keep the grill’s valve compartment, burners and circulating air passages clean.
- ▲ Inspect grill before each use.

Important Safeguards Warning

- ▲ Do NOT alter grill in any manner. Any alteration will void your warranty.
- ▲ Do NOT use the grill unless it is COMPLETELY assembled and all parts are securely fastened and tightened.
- ▲ Do NOT build this model of grill in any built-in or slide-in construction. Ignoring this warning could cause a fire or an explosion that can damage property and cause serious bodily injury or death.
- ▲ This grill should be thoroughly cleaned and inspected on a regular basis.
- ▲ Clean and inspect the hose before each use of the appliance. If there is evidence of abrasion, wear, cuts or leaks, the hose must be replaced prior to operation.
- ▲ Use only the regulator and hose assembly provided. Use only the replacement regulator and hose assembly specified by RevoAce Inc. Limited
- ▲ Use only RevoAce Inc. Limited. factory-authorized parts. The use of any part that is not factory-authorized can be dangerous and will void your warranty.
- ▲ Do NOT operate this appliance without reading “Operating Instructions” in this manual.
- ▲ Do NOT touch metal parts of grill until they have completely cooled to avoid burns, unless you are wearing protective gear (pot holders, gloves, BBQ mitts, etc.).
- ▲ Do NOT install or use in or on boats or recreational vehicles.
- ▲ When cooking, fire extinguishing materials should be readily accessible. In the event of an oil/grease fire, do NOT attempt to extinguish with water. Use type BC dry chemical fire extinguisher or smother with dirt, sand or baking soda.
- ▲ Do NOT use grill in high winds.
- ▲ **Charcoal:** Position grill so wind cannot carry ashes to combustible surfaces.
- ▲ Never lean over the grill when lighting.
- ▲ Do NOT leave a lit grill unattended. Keep children and pets away from grill at all times.
- ▲ Do NOT leave grill unattended while preheating or burning off food residue on high. If grill has not been cleaned, a grease fire can occur that may damage the product.
- ▲ Do NOT place empty cooking vessels on the appliance while in operation.
- ▲ Use caution when placing anything on the grill while the appliance is in operation.
- ▲ Do NOT attempt to move grill when in use. Allow the grill to cool before moving or storing.
- ▲ LP gas cylinder must be properly disconnected and removed prior to moving this grill.
- ▲ Storage of grill indoors is permissible only if the cylinder is disconnected, removed from the grill and properly stored outdoors.
- ▲ **Charcoal:** Never add lighting fluid to hot or warm coals as a flashback may occur causing serious injury or damage to property.
- ▲ **Charcoal:** Do NOT remove the ashes until they are completely and fully extinguished.
- ▲ **Charcoal:** Live hot briquettes and coals can create a fire hazard.
- ▲ **Charcoal:** Always empty the bottom bowl and grill after each use.
- ▲ **Charcoal:** Do NOT place fuel (charcoal briquettes, wood or lump charcoal) directly into bottom of grill. Place fuel only on the charcoal pan/grid.
- ▲ **Charcoal:** Do NOT allow charcoal to rest on the walls of grill. Doing so will greatly reduce the life of the metal and finish of your grill.
- ▲ **Charcoal:** Check to make sure the air vents are free of debris and ash before using the grill.
- ▲ **Charcoal:** Extinguished coals and ashes should be placed a safe distance from all structures and combustible materials.
- ▲ **Charcoal:** With a garden hose, completely wet the surface beneath and around grill to extinguish any ashes, coals or embers that may have fallen during the cooking or cleaning process.
- ▲ Always open grill lid carefully and slowly as heat and steam trapped within grill can cause severe burns.
- ▲ Do NOT attempt to disconnect the gas regulator from the cylinder or any gas fitting while the grill is in use.
- ▲ Always place your grill on a hard, non-combustible, level surface. An asphalt or blacktop surface may not be acceptable for this purpose.
- ▲ Move gas hoses as far away as possible from hot surfaces and dripping hot grease.
- ▲ Keep all electrical cords away from a hot grill.
- ▲ After a period of storage and/or nonuse, check for leaks, burner obstructions and inspect for any abrasion, wear or cuts to the hose.
- ▲ Failure to open lid while igniting the grill’s burners, or not waiting 5 minutes to allow the gas to clear if the grill does not light, may result in an explosive flare-up.
- ▲ Never operate grill without its heat plates installed.
- ▲ Always use a meat thermometer to ensure food is cooked to a safe temperature.
- ▲ Use protective gloves when assembling this product.
- ▲ Do NOT force parts together as this can result in personal injury or damage to the product.
- ▲ Never cover entire cooking area with aluminum foil.
- ▲ Death, serious injury or damage to property may occur if the above is not followed exactly.

Parts List

- 1 Smoke Stack Top
- 2 Smoke Stack
- 3 Lid Handle (2)
- 4 Temperature Gauge (2)
- 5 Charcoal Lid
- 6 LP Gas Lid
- 7 Charcoal Warming Rack
- 8 Gas Warming Rack
- 9 Top Hinge (4)
- 10 Bottom Hinge (4)
- 11 Heat Plate (3)
- 12 Charcoal Cooking Grid (2)
- 13 Charcoal Pan
- 14 Left Side Shelf
- 15 LP Gas Burner Support (3)*
- 16 Back Panel
- 17 Left Panel
- 18 Center Panel
- 19 LP Gas Burner (3)
- 20 Igniter Electrode (3)*
- 21 LP Gas Cooking Grid (2)
- 22 Charcoal Pan Handle Support
- 23 Front Heat Plate Support
- 24 LP Gas Heat Shield
- 25 LP Gas Panel
- 26 Side Air Vent
- 27 Charcoal Door Handle Support
- 28 Front Panel
- 29 LP Gas Manifold*
- 30 Regulator/Hose Assembly*
- 31 Side Burner Grid
- 32 Charcoal Pan Handle
- 33 Charcoal Door Handle
- 34 Control Knob (4)
- 35 Receiver Tray Support
- 36 Ash Receiver Tray
- 37 Grease Receiver Tray
- 38 Tray Handle (2)
- 39 Right Panel
- 40 Lighting Rod
- 41 Right Side Shelf
- 42 Side Burner
- 43 Side Burner Igniter Electrode*
- 44 Bottom Rack
- 45 Bottle Opener
- 46 Left Leg (2)
- 47 Bottom Shelf
- 48 Foot (2)
- 49 LP Gas Tank Retainer Wire

50 Right Leg (2)

51 Axle

52 Wheel (2)

53 Grease Cup

M10-M8 Wrench 1 pc

Assembly Instructions

1 DO NOT RETURN TO PLACE OF PURCHASE.

For assistance, call **1-800-694-0013** toll-free. Please have your Owner's Manual and model number available for reference.

Note: The model number is printed on a label which can be found on the inside door, back or side of the cart assembly.

Assembly Tips:

1. Select an area where you will assemble this product. To protect components, choose a smooth surface that's free of cracks or openings.
2. Spread out all parts.
3. Tighten all hardware connections by hand first. Then, before completing each step, go back and fully tighten all hardware. Be careful not to over-tighten. That could damage surfaces or strip threads.
4. For best results, complete each step in the order presented.

To complete assembly you will need:

- **PROPANE:** (1) Leak detection solution (instructions on how to make the solution are included in the "Operating Instructions" section of this manual) (not included).
- **PROPANE:** (1) Precision-filled LP gas grill tank with Acme Type 1 external threaded valve connection (standard grill size) (not included).
- **CHARCOAL:** One bag of charcoal (not included).

Typical assembly is approximately one hour.

2 Attach Lid Handles, Temperature Gauges and Top Hinges

3 Attach Smoke Stack and Smoke Stack Top

4 Assemble Front, Center and Back Panels and Attach Charcoal Pan Handle Support

5 Attach LP Gas Manifold, Regulator/Hose Assembly, Charcoal Door Handle and Charcoal Door Handle Support

6 Assemble LP Gas Panel, LP Gas Heat Shield and Front Heat Plate Support

7 Attach LP Gas Heat Shield

8 Attach Left Panel and Right Panel

9 Attach Receiver Tray Support

10 Attach Feet, Legs and Bottle Opener

11 Attach Bottom Shelf

12 Insert Axle and Attach Wheels

13 Attach Bottom Rack

14 Attach Bottom Hinges

15 Attach Charcoal Pan

16 Attach Charcoal Pan Handle, Side Air Vent and Lighting Rod

17 Attach Igniter Wires and Burners

18 Attach Left Side Shelf and Tool Holders (Hardware F)

19 Attach Right Side Shelf

20 Attach Side Burner Gas Valve

21 Insert Side Burner, Igniter Wire and Side Burner Grid

22 Attach Lids

23 Attach LP Gas Tank Retainer Wire

24 Attach Tray Handles

25 Insert Ash Receiver Tray, Grease Receiver Tray and Control Knobs

26 Insert Grease Cup

27 Insert Warming Racks

28 Insert Heat Plates and Cooking Grids

Installing LP Gas Tank

To operate, you will need one precision-filled standard grill LP gas tank with external valve threads.

Inserting LP Gas Tank

Place precision-filled LP gas tank upright into the notches in the right cart frame so the tank valve is facing the gas line connection. Secure tank by sliding the tank retainer wire over shoulder of LP gas tank.

Connecting LP Gas Tank

1. Before connecting, be sure there is no debris caught in the head of the LP gas tank, head of the regulator valve or in the head of the burner or burner ports.
2. Connect regulator/hose assembly to tank by turning knob clockwise until it stops.

Disconnecting LP Gas Tank

1. Before disconnecting, make sure the LP gas tank valve is "CLOSED."
 2. Disconnect regulator/hose assembly from LP gas tank by turning knob counterclockwise until it is loose.
- ⚠ **CAUTION: LP gas tank must be properly disconnected and removed prior to moving this grill.**
3. Place the protective cap cover on the LP tank and store the tank outdoors in a well ventilated area out of direct sunlight.

Operating Instructions

Checking for Leaks

Burner Connections

1. Make sure the regulator hose and valve connections are securely fastened to the burner and the tank.
 2. Visually check the connection between the burner/venturi tube and orifice.
 3. Make sure the burner/venturi tube fits over the orifice.
- ▲ WARNING: Failure to inspect this connection or follow these instructions could cause a fire or an explosion which can cause death, serious bodily injury or damage to property.**
4. Please refer to diagram for proper installation (Figure 1 and 2).
 5. If the burner/venturi tube does not rest flush to the orifice, as shown, please contact 1.800.694.0013 for assistance.

Tank/Gas Line Connection

1. Make 2-3 oz. of leak detection solution by mixing one part liquid dishwashing soap with three parts water.
2. Make sure control knobs are in the "OFF" position (Figure 2).
3. Connect LP gas tank per "Installing LP Gas Tank" section.
4. Turn LP gas tank valve to "OPEN."
5. Spoon several drops of solution, or use a squirt bottle, at all "X" locations (Figures 1, 2 and 4).
 - a. If any bubbles appear, turn LP gas tank valve to "CLOSED," reconnect and re-test.
 - b. If you continue to see bubbles after several attempts, turn LP gas tank valve to "CLOSED" and disconnect LP gas tank, per "Disconnecting LP Gas Tank" section.
 - c. If no bubbles appear after one minute, turn LP gas tank valve to "CLOSED," wipe away solution and proceed.

Operating Main Burners

First Use

1. Make sure all labels, packaging and protective films have been removed from the grill.
2. Remove manufacturing oils before cooking on this grill for the first time by operating the grill for at least 15 minutes on 🔥 (HIGH) with the lid closed. This will "heat clean" the internal parts and dissipate odors.

Lighting

- ▲ CAUTION: Keep outdoor gas cooking appliance area clear and free from combustible materials, gasoline and other flammable vapors and liquids.**
- ▲ CAUTION: Do NOT obstruct the flow of combustion and ventilation air.**
- ▲ CAUTION: Check and clean burner/venturi tubes for insects and insect nests. A clogged tube can lead to a fire.**
- ▲ CAUTION: Attempting to light the burner with the lid closed may cause an explosion.**

1. Open lid.
2. Check for obstructions of airflow to the burners. Spiders, insects and webs can clog the burner/venturi tube. A clogged burner tube can lead to a fire.
3. All control knobs must be in the "OFF" position (Figure 3).
4. Connect LP gas tank per "Installing LP Gas Tank" section.
5. Turn LP gas tank valve to "OPEN."
6. Push and turn any control knob to 🔥 (HIGH). The burner should light. If it does not, repeat up to three times.
7. If ignition does not occur in 5 seconds, turn burner control knob "OFF," wait 5 minutes, and repeat lighting procedure.
8. If igniter does not light burner, use a lit match secured with the lighting rod (included with grill) to light burners. Access the burners through the cooking grid and heat plates. Position lit match near side of burner (Figure 5).

Important: Always use the lighting rod (included) when lighting burners with a match.

9. After lighting, observe the burner flame. Make sure all burner ports are lit and flame height matches illustration (Figure 6).

Note: Each burner lights independently - repeat steps 5-9 for the other burners.

Turning Off

1. Turn LP gas tank valve to "CLOSED."
2. Turn all control knobs clockwise to the "OFF" position.
Note: A "poof" sound is normal as the last of the LP gas is burned.
3. Disconnect LP gas tank per "Disconnecting LP Gas Tank" section.

Controlling Flare-ups

1. If a grease fire develops, turn control knobs to the "OFF" position and LP gas tank valve "CLOSED." Do NOT use water on a grease fire. This can cause the grease to splatter and could result in serious burns, bodily harm or other damage.
2. Do NOT leave grill unattended while preheating or burning off food residue on 🔥 (HIGH). If grill has not been cleaned, a grease fire can occur.

Flare-ups are a part of cooking meats on a grill and add to the unique flavor of grilling.

Excessive flare-ups can over-cook your food and be dangerous.

Important: Excessive flare-ups result from the build-up of grease in the bottom of your grill.

If a grease fire occurs, close the lid **AND** turn the control knob(s) to "OFF" until the grease burns out. Be careful when opening the lid as sudden flare-ups may occur.

If excessive flare-ups occur, **do NOT** pour water onto the flames.

Minimize Flare-ups:

1. Trim excess fat from meats prior to cooking.
2. Cook high fat content meats on 🔥 (LOW) setting or indirectly.
3. Ensure that your grill is on a hard, level, non-combustible surface and the grease is allowed to drain into grease receptacle.

Figure 1: Main Burners

Figure 2: Side Burner

Figure 3

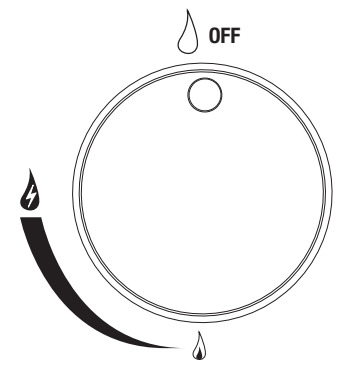

Figure 4

Figure 5

Figure 6

⚠	CAUTION	⚠
<p>▲ If burner flame goes out during operation, immediately turn the control knobs to the "OFF" position, LP gas tank valve "CLOSED" and open lid to let the gas clear for 5 minutes before re-lighting.</p>		

⚠	CAUTION	⚠
<p>▲ Putting out grease fires by only closing the lid is not possible.</p>		

⚠	WARNING	⚠
<p>▲ When cooking, fire extinguishing materials should be readily accessible. In the event of an oil/grease fire, use type BC dry chemical fire extinguisher or smother with dirt, sand or baking soda. Do NOT attempt to extinguish with water.</p>		

Operating Instructions (continued)

Operating Side Burner

NOTE: Side burner can be used while main burners are operating. Never use side burner as a grill.

▲ CAUTION: Maximum weight for side burner and side shelf is 33 lbs.

▲ CAUTION: Using pots larger than 6 quarts in capacity could exceed weight limit of the side burner shelf, resulting in failure of grill cart components.

▲ CAUTION: Do NOT lean on the side burner shelf.

▲ CAUTION: Attempting to light the burner with the lid closed may cause an explosion.

Lighting

1. Open lid.
2. Check for obstructions of airflow to the burners. Spiders, insects and webs can clog the burner/venturi tube. A clogged burner tube can lead to a fire.
3. Control knob must be in the "OFF" position (Figure 3).
4. Connect LP gas tank per "Installing LP Gas Tank" section.
5. Turn LP gas tank valve to "OPEN."
6. Push and turn control knob to HIGH. The burner should light. If not, repeat up to three times.
7. If ignition does not occur in 5 seconds, turn burner control knob "OFF," wait 5 minutes and repeat lighting procedure.
8. If igniter does not light burner, use a lit match secured with the lighting rod (included with grill) to light burners. Position the lit match near side of the burner (Figure 7).

Important: Always use the lighting rod (included) when lighting burner with a match.

9. After lighting, observe the burner flame. Make sure all burner ports are lit and flame height matches illustration (Figure 6).

▲ CAUTION: If burner flame goes out during operation, immediately turn the control knob to the "OFF" position and LP gas tank valve "CLOSED" and open lid to let the gas clear for 5 minutes before re-lighting.

Turning Off

1. Turn LP gas tank valve to "CLOSED."
2. Turn control knob clockwise to the "OFF" position.
Note: A "puff" sound is normal as the last of the LP gas is burned.
3. Disconnect LP gas tank per "Disconnecting LP Gas Tank" section.

Cooking

1. Open lid and ignite the side burner per "Lighting" instructions.
2. Adjust control knob to desired flame height.
3. Place pan on center of grid.
4. Cook and adjust temperature as needed.
5. Turn grill off per "Turning Off" instructions.

Figure 7

Operating Charcoal Grill

▲ CAUTION: Never use charcoal that has been pre-treated with lighter fluid. Use only a high grade plain charcoal, charcoal/wood mixture, lump charcoal or cooking wood.

First Use

1. Make sure all labels, packaging and protective films have been removed from the grill.
2. Remove manufacturing oils before cooking on this grill for the first time, by operating the grill for at least 15 minutes with the lid closed. This will "heat clean" the internal parts and dissipate odors.

Lighting Instructions

▲ CAUTION: Keep outdoor cooking appliance area clear and free from combustible materials, gasoline and other flammable vapors and liquids.

▲ CAUTION: Check to make sure the air vents are free of debris and ash before using the grill.

▲ CAUTION: Attempting to light the grill with the lid closed may cause an explosion.

▲ CAUTION: When using a liquid starter, always check bottom bowl before lighting. Fluid can collect in the bottom bowl and could ignite, resulting in a fire.

▲ CAUTION: Never add lighting fluid to hot or warm coals as flashback may occur, causing serious injury or damage to property.

1. Open lid and vents.
2. Make sure bottom bowl is empty.
3. Remove cooking grid.
4. Arrange charcoal briquettes or other fuel on the charcoal grid to the "Fill Line" (Figure 8).
5. Light per instructions on fuel package.
6. Allow fuel time to ash into glowing coals before cooking.

Figure 8

Turning Off

1. Allow charcoal to completely extinguish itself.
- ▲ WARNING: Do NOT use water to extinguish. This can be dangerous and cause damage.**
2. Dispose of the ashes in a proper location.

Controlling Flare-ups:

▲ CAUTION: Do NOT use water on a grease fire. This can cause the grease to splatter and could result in serious burns, bodily harm or other damage.

▲ CAUTION: Do NOT leave grill unattended while preheating or burning off food residue. If grill has not been cleaned, a grease fire can occur that may damage the product.

▲ WARNING: When cooking, fire extinguishing materials should be readily accessible. In the event of an oil/grease fire, use a type BC dry chemical fire extinguisher or smother with dirt, sand or baking soda. Do NOT attempt to extinguish with water.

Flare-ups are a part of cooking meats on a grill and adds to the unique flavor of grilling.

Excessive flare-ups can overcook your food and can be dangerous.

Important: Excessive flare-ups result from the build-up of grease in the bottom of your grill.

If a grease fire occurs, close the lid until the grease burns out. Use caution when opening the lid as sudden flare-ups may occur.

If excessive flare-ups occur, do **NOT** pour water onto the flames.

Minimize Flare-ups:

1. Trim excess fat from meats prior to cooking.
2. Cook high fat content meats indirectly.
3. Ensure that your grill is on a hard, level, non-combustible surface.

Cleaning and Care

Before Each Use:

1. Keep the grill area clean and free from any combustible materials, gasoline, and other flammable vapors and liquids.
2. Do NOT obstruct the flow of the combustion of LP gas and the ventilation of air.
3. Keep the ventilation opening(s) of the LP gas tank area free and clear from debris.
4. Visually check the burner flames to make sure your grill is working properly (Figure 6).
5. See sections below for proper cleaning instructions.
6. Check for obstructions of airflow to the burners. Spiders, insects and webs can clog the burner/venturi tube. A clogged burner tube can lead to a fire.

Cleaning Surfaces

1. Wipe surfaces clean with mild dishwashing detergent or baking soda mixed with water.
2. For stubborn surfaces, use a citrus-based degreaser and a nylon scrubbing brush.
3. Rinse clean with water.
4. Allow to air dry.

Cleaning Main Burners

1. Turn LP gas tank valve to "CLOSED."
2. Turn all control knobs clockwise to the "OFF" position.
Note: A "poof" sound is normal as the last of the gas is burned.
3. Disconnect LP gas tank per "Disconnecting LP Gas Tank" section.
4. Remove cooking grids and heat plates.
5. Remove burners by removing the fasteners, which secure the burners to the grill bottom.
6. Lift burners up and away from gas valve orifice.
7. Disconnect wire from spark electrode.
8. Clean venturi of each burner with small bottle brush or compressed air.
9. Remove all food residue and dirt from burner surface.
10. Clean any clogged ports with a stiff wire (such as an opened paper clip).
11. Inspect burners for any damage (cracks or holes). If damage is found, replace with new burner(s) from manufacturer.
12. Re-install burner(s). Checking to insure that gas valve orifice is correctly positioned inside each burner/venturi tube. Also, check position of spark electrode.
13. Replace heat plate(s) and cooking grid(s).
14. Connect LP gas tank per "Installing LP Gas Tank" section.
15. Perform leak test per "Checking for Leaks" section.

Cleaning Side Burner

1. Turn LP gas tank valve to "CLOSED."
2. Turn all control knobs clockwise to the "OFF" position.
Note: A "poof" sound is normal as the last of the gas is burned.
3. Disconnect LP gas tank per "Disconnecting LP Gas Tank" section.
4. Remove side burner grid.
5. Remove burner by removing the screws that secure the burner to the side shelf.
6. Lift burner up and away from gas valve orifice.
7. Clean venturi of burner with small bottle brush or compressed air.
8. Remove all food residue and dirt from burner surface.
9. Clean any clogged ports with a stiff wire (such as an opened paper clip).
10. Inspect burner for any damage (cracks or holes). If damage is found, replace with new burner from manufacturer.
11. Re-install burner(s). Checking to insure that gas valve orifice is correctly positioned inside each burner/venturi tube. Also, check position of spark electrode.
12. Replace cooking grid(s).
13. Connect LP gas tank per "Installing LP Gas Tank" section.
14. Perform leak test per "Checking for Leaks" section.

Before Storing

1. Turn LP gas tank valve to "CLOSED."
2. Turn all control knobs clockwise to the "OFF" position.
Note: A "poof" sound is normal as the last of the gas is burned.
3. Disconnect LP gas tank per "Disconnecting LP Gas Tank" section.
4. Clean all surfaces.
5. Lightly coat the burner(s) and cooking grid(s) with cooking oil to prevent excess rusting.
6. If storing the grill indoors, disconnect the LP tank per "Disconnecting LP Gas Tank" section.
7. Place the protective cap cover on the LP tank and store the tank outdoors in a well-ventilated area out of direct sunlight.
8. If storing the grill indoors, cover the grill and store in a cool dry place.
9. If storing the grill outdoors, cover the grill with a grill cover for protection from the weather.

!	CAUTION	!
<ol style="list-style-type: none"> 1. All cleaning and maintenance should be done when grill is cool and with the fuel supply disconnected. 2. Do NOT clean any grill part in a self-cleaning oven. The extreme heat will damage the finish. 3. Do NOT enlarge valve orifices or burner ports when cleaning the valves or burners. 		

!	NOTICE	!
<ol style="list-style-type: none"> 1. This grill should be thoroughly cleaned and inspected on a regular basis. 2. Abrasive cleaners will damage this product. 3. Never use oven cleaner to clean any part of grill. 		

Figure 9

Burner Flame Conditions

Use this chart to see if your burners need to be cleaned.

Normal: Soft blue flames with yellow tips between 1 in. - 2 in. height.

Needs cleaning: Noisy with hard blue flames.

Has to be replaced: Wavy with yellow flames.

Troubleshooting

Problem	Possible Cause	Prevention/Cure
Burner will not light using igniter	LP gas tank valve is closed	Make sure regulator is securely attached to the LP gas tank per "Installing LP Gas Tank," then turn LP gas tank valve to "OPEN"
	LP gas tank is low or empty	Exchange, refill or replace LP gas tank
	LP gas	<ol style="list-style-type: none"> 1. Turn LP gas tank valve to "CLOSED" 2. Wait 5 minutes for gas to clear 3. Follow "Checking for Leaks" section
	Wires or electrode covered with cooking residue	Clean wire and/or electrode with rubbing alcohol
	Electrode and burners are wet	Wipe dry with cloth
	Electrode cracked/broken - sparks at crack	Replacement part(s) may be needed - contact Customer Care at 1.800.694.0013
	Wire loose or disconnected	Reconnect wire or replacement part(s) may be needed - contact Customer Care at 1.800.694.0013
	Wire is shorting (sparking) between ignitor and electrode	Replacement part(s) may be needed - contact Customer Care at 1.800.694.0013
Burner will not light with match	Bad igniter	Replacement part(s) may be needed - contact Customer Care at 1.800.694.0013
	No gas flow	Check if LP gas tank is empty A. If empty, exchange, refill or replace LP gas tank B. If LP gas tank is not empty, refer to "Sudden drop in gas flow or reduced flame height" (see below)
	LP gas tank is low or empty	Exchange, refill or replace LP gas tank
	LP gas	<ol style="list-style-type: none"> 1. Turn LP gas tank valve to "CLOSED" 2. Wait 5 minutes for gas to clear 3. Follow "Checking for Leaks" section
	Coupling nut and regulator not fully connected	Turn the coupling nut about one-half to three-quarters additional turn until solid stop. Tighten by hand only - do NOT use tools
	Obstruction of gas flow	<ol style="list-style-type: none"> 1. Clear burner/venturi tube 2. Check for bent or kinked hose
	Disengagement of burner to valve	Reengage burner and valve
	Spider webs or insect nest in venturi	Clean burner/venturi tube
Sudden drop in gas flow or reduced flame height	Burner ports clogged or blocked	Clean burner ports
	Out of gas	Exchange, refill or replace LP gas tank
Irregular flame pattern, flame does not run the full length of burner	Overfilling prevention device may have been activated	<ol style="list-style-type: none"> 1. Turn control knobs to "OFF" 2. Wait 30 seconds and light grill 3. If flames are still too low, reset the overfilling prevention device: <ol style="list-style-type: none"> a. Turn control knob(s) "OFF" b. Turn LP gas tank valve to "CLOSED" c. Disconnect regulator d. Turn control knobs to HIGH e. Wait 1 minute f. Turn control knobs to "OFF" g. Reconnect regulator and leak check connections, being careful not to fully open valve h. Light grill per "Lighting" section
	Burner ports are clogged or blocked	Clean burner ports
Flame is yellow or orange	New burner may have residual manufacturing oils	Burn grill for 15 minutes on HIGH with the lid closed
	Spider webs or insect nest in venturi	Clean venturi
	Food residue, grease, etc. on burners	Clean burner
	Poor alignment of valve to burner/venturi tube	Ensure burner/venturi tube is properly engaged with valve
Flame goes out	High or gusting winds	Do not use grill in high winds
	Low on LP Gas	Exchange, refill or replace LP gas tank
	Overfilling prevention device may have been activated	Refer to "Sudden drop in gas flow or reduced flame height" (see above)
Flare-up	Grease buildup	Remove and clean all grill parts per "Cleaning and Care" section
	Excess fat in meat	Trim fat from meat before grilling
	Excessive cooking temperature	Adjust to lower cooking temperature
Persistent grease fire	Grease trapped by food buildup around burner system	<ol style="list-style-type: none"> 1. Turn control knobs to "OFF" 2. Turn LP gas tank valve to "CLOSED" 3. Leave lid in closed position and let fire burn out 4. After grill cools, remove and clean all parts per "Cleaning and Care" section
Flashback (fire in burner tube(s))	Burner and/or burner/venturi tube are blocked	Clean burners and/or burner/venturi tube
Inside of lid is peeling (like paint peeling)	Baked on grease buildup has turned to carbon and is flaking off.	Clean all grill parts per "Cleaning and Care" section.
