BROOKE USE INSTRUCTIONS

STEP 1

ADD SAND

Before using, add a 1-1.5 in. layer of sand or about 5 lbs. (size wise, its the same amount as a 5 lb. bag of sugar) to the bottom of the firebox. This will help neutralize the corrosive nature of the ashes and help radiate the heat upwards.

STEP 2

ADD FUEL

Add up to 5 lbs. of kindling and firewood to the firebox. Use paper or firestarter under the kindling and light with a match. Add more firewood as needed. The capacity of the fire pit is 5 lbs. of fuel.

HELPFUL HINTS:

CLEANING

For best results, the fire pit should be cleaned after every use. Make sure fire pit is cool and all embers are extinguished before cleaning.

If any remaining firewood needs to be removed, use poker or shovel to remove. Any sand can be reused.

Dispose of ashes in proper receptacle only after ashes have cooled. Do not dump ashes where a fire can be started.

If the fire pit needs to be cleaned, use a mild soap and water with a soft rag. Dry thoroughly to prevent rust.

Occasionally, the fire pit finish will need to be refinished. Use a high quality, high heat paint to renew the finish.
